Manufacturing Engineering and Technology Serope Kalpakjian, Steven R. Schmid, 2024-12 In view of the advances being made in all aspects of manufacturing this text continues to present a comprehensive balanced and most importantly an up to date coverage of the science engineering and technology of manufacturing As in its previous editions this text maintains the same number of chapters while continuing to emphasize the interdisciplinary nature of all manufacturing activities including complex interactions among materials design and manufacturing processes and operations Every attempt has been made to motivate and challenge students to understand and develop an appreciation of the vital importance of manufacturing in the modern global economy The extensive questions and problems at the end of each chapter are designed to encourage students to explore viable solutions to a wide variety of challenges giving them an opportunity to describe and assess the capabilities as well as limitations of all manufacturing processes and operations These challenges include economic considerations and the competitive aspects in a global marketplace The numerous examples and case studies throughout the book also help give students a perspective on real world applications of the topics described throughout the book

Advanced Machining Processes Muslim Mahardika, Andi Sudiarmo, 2018-05-02 Advanced machining processes has significant contributions to the manufacturing industries especially since many new invented materials have advanced properties which are difficult to machine using conventional machining processes Therefore advanced machining processes take a lead in dealing with these types of material This book focuses on electrical machining and electrical dressing processes Chapter 1 explains the electrochemical machining ECM includes process parameters that involved in the ECM processes Chapter 2 deals with another advanced machining process i e electro discharge machining EDM Several process parameters that contribute to the EDM processes are also discussed Electrical dressing is described in Chapter 3 as a special application of ECM and EDM Finally other types of non conventional machining are explained in Chapter 4 UGM Press UGM Gadjah Mada University Press
