Communicating with Data Deborah Nolan, Sara Stoudt, 2021-03-25 Communication is a critical yet often overlooked part of data science. *Communicating with Data* aims to help students and researchers write about their insights in a way that is both compelling and faithful to the data. General advice on science writing is also provided, including how to distill findings into a story and organize and revise the story and how to write clearly, concisely, and precisely. This is an excellent resource for students who want to learn how to write about scientific findings and for instructors who are teaching a science course in communication or a course with a writing component. *Communicating with Data* consists of five parts. Part I helps the novice learn to write by reading the work of others. Part II delves into the specifics of how to describe data at a level appropriate for publication, create informative and effective visualizations, and communicate an analysis pipeline through well-written, reproducible code. Part III demonstrates how to reduce a data analysis to a compelling story and organize and write the first draft of a technical paper. Part IV addresses revision; this includes advice on writing about statistical findings in a clear and accurate way, general writing advice, and strategies for proof reading and revising. Part V offers advice about communication strategies beyond the page, which include giving talks, building a professional network, and participating in online communities. This book also provides 22 portfolio prompts that extend the guidance and examples in the earlier parts of the book and help writers build their portfolio of data communication.

Understanding the Adult Learner Alisa Belzer, Brian Dashew, 2023-07-03 Adults seek out learning for very different reasons in different contexts, and this book is intended to support adult educators' development in responding to this rich array. There is no single way to be an adult learner, and so it should not be surprising that there is no single way to be an adult educator. However, the authors believe that all educators must demonstrate a commitment to meeting adult learners where they are. Adult educators should help learners move forward not only with new content, knowledge, information, and skills but also with new ways of making meaning and seeing themselves, their role, and the world. This volume introduces many theories and concepts that can help adult educators do this effectively.
