**Mental Health Issues in Adolescent Life: Electronic Addiction Among Adolescents** Hamid Yahya Hussain, 2021-03-06 Electronic addiction disorder is not officially recognized as a disorder by the psychiatric community yet it was not included in the recently released Diagnostic and Statistical Manual of Mental Disorder V DSM V published by the American Psychiatric Association an alarming number of people show what appear to be signs of addiction to the digital world Young people seem especially vulnerable with case studies highlighting students whose academic performance plummets as they spend more and more time online Some also suffer health consequences from loss of sleep as they stay up later and later to chat online check for social network status updates or to reach the next game levels There have been a number of tragic cases that have grabbed headlines and heightened the public's concerns about compulsive Internet use While it is presumptuous to blame Internet addiction for such tragedies the young people involved may have suffered from other pathologies that led to such negative outcomes the cases certainly draw attention to the darker side of Internet use Putting aside for a moment the debate over whether such problems should be framed as Internet addiction disorder research into these behaviors has grown dramatically since the mid 1990s particularly as more and more cases among college students have come to the attention of university health professionals Besides Internet addiction terms such as problematic Internet use dysfunctional Internet use Internet dependency pathological Internet use and compulsive Internet use have been proposed as ways to describe these behaviors For this book I will employ Internet addiction because it is widely used in the research but I will come back to the question of nomenclature
