Applications of LC-MS in Environmental Chemistry Damia Barcelo, 1996-03-21 Looking at the literature available it is clear that there is a need for a book on LC MS applications in environmental analysis This book endeavours to answer the following questions What interface to use to solve my detection problem Can I obtain enough sensitivity for the confirmation of my compound in real world environmental samples Is there enough structural information The present book aims to provide a critical evaluation of LC MS in environmental chemistry and it is structured in different areas Apart from an introductory section with fundamental aspects application areas using the most relevant interfacing systems PB TSP ES for the characterization of environmental compounds are included In this sense applications are discussed on the characterization of the most relevant compounds of environmental interest such as pesticides detergents dyes polar metabolites waste streams organotin

compounds and marine toxins with comparison between different interfacing systems Finally new methods and strategies in LC MS e g the use of capillary electrophoresis MS together with on line post column systems in LC MS are also shown By the nature of its content and written as it is by experienced practitioners the book is intended to serve as a practical reference for analytical chemists who need to use LC MS in environmental studies Each chapter includes sufficient references to the literature to serve as a valuable starting point and also contains detailed investigations The broad spectrum of the book and its application to environmental priority compounds makes it unique in many ways A Global View of LC/MS Ross
