Mandhyan, 2011-01-01 Food Process Engineering focuses on the design operation and maintenance of chemical and other process manufacturing activities The development of Agro Processing will spur agricultural diversification There are several

benefits of promoting small scale agro processing units rather large scale for the promotion of rural entrepreneurship
Appropriate post harvest management and value addition to agricultural products in their production catchments will lead to
employment and income generation in the rural sector and minimize the losses of harvested biomass Adoption of suitable
technology plays a vital role in fixing the cost of the final product and consequently makes the venture a profitable one It is
observed that imported agro processing machines or their imitations are used for preparing food products Actually the
working of these machines should be critically studied in context of the energy input and the quality of the finished product

major focus is on hydrogen discussion of fossil fuels and nuclear power is also presented where appropriate This monograph
is written by recognized experts in the field and is both timely and appropriate as this decade will see application of
hydrogen as an energy carrier for example in transportation sector The world s reliance on fossil fuels is due to the ever
growing need for energy to sustain life and on going progress however exploitation also brings consequences such as
emission of carbon nitrogen and sulfur dioxides into the atmosphere The collective influence of these photochemical gases is
production of acid rain and an alternation of global temperatures leading to record high temperatures in many parts of the
world The fossil fuel is unsustainable and thus there is a critical need for alternative sustainable energy resources One
universal energy carrier is hydrogen which is the focus of this volume This book is suitable for those who work in the energy
field as technical experts including engineers and scientists as well as managers policy and decision makers
environmentalists and consultants Students and practitioners such as lectures teachers legislators and their aids in the field
