Managing India's Nuclear Forces Verghese Koithara, 2012-04-16 India is now enmeshed in the deterrence game actively with its traditional adversary Pakistan and potentially with China At the same time it is finding easier access to fissile materials and strategic technologies In order to deal with these developments safely and wisely the nation needs a much more sophisticated and multidisciplinary understanding of the strategic technological operational and cost issues involved in nuclear matters In this important book Indian strategic analyst Verghese Koithara explains and evaluates India's nuclear force management encouraging a broad public conversation that may act as a catalyst for positive change before the subcontinent experiences unthinkable carnage The defense management system of a nuclear power absolutely needs to be sound and thorough In addition to the considerable demands of managing its nuclear forces it also must control conventional forces in a manner that forestalls nuclear escalation of a conflict by either side Expanding and upgrading nuclear forces without enhancing deterrence is dangerous and should be avoided India's nuclear force management system is grafted onto a woefully inadequate overall system of defense management Koithara dissects all of these issues and suggests a way forward drawing on recent developments in deterrence theory around the world **Indian National Bibliography** B.
