Temkin,2022-01-13 In a world filled with both enormous wealth and pockets of great devastation how should the well off respond to the world s needy This is the urgent central question of Being Good in a World of Need Larry S Temkin one of the world s foremost ethicists challenges common assumptions about philanthropy his own prior beliefs and the dominant philosophical positions of Peter Singer and Effective Altruism Filled with keen analysis and insightful discussions of philosophy current events development economics history literature and age old wisdom this book is a thorough and sobering exploration of the complicated ways that global aid may incentivize disastrous policies reward corruption and foster brain drains that hinder social and economic development Using

real world examples and illuminating thought experiments Temkin discusses ethical imperialism humanitarian versus developmental aid how charities ignore or coverup negative impacts replicability and scaling up problems and the views of the renowned economists Angus Deaton and Jeffrey Sachs all within the context of deeper philosophical issues of fairness responsibility and individual versus collective morality At times both inspiring and profoundly disturbing he presents the powerful argument that neglecting the needy is morally impermissible even as he illustrates that the path towards helping others is often fraught with complex ethical and practical perils Steeped in empathy morality pathos and humanity this is an engaging and eye opening text for any reader who shares an intense concern for helping others in need *Oil Belly, Flat Belly* Sonja Y. Leggett,2005 The single global marketplace we all inhabit is built on the notion of a solid growing supply of cheap oil and gas for decades to come But that bedrock is about to crack and crumble And the oil companies know it As geologists civil servants and industry insiders in this hard hitting book tell us the day the oil wells start to run dry is a lot closer than we think Jeremy Leggett a geologist who spent the 1980s in the service of Big Oil before jumping ship in the 1990s to become Chief Scientist at Greenpeace UK and then launching his own renewable energy initiatives understands the scale of the impending crisis and the need for us to act now With watertight knowledge and sobering clarity Leggett explains how we became addicted to oil and how this habit is dragging us into an increasingly dangerous dependence upon the Middle East and towards economic and environmental catastrophe And yet his outlook is paradoxically positive for all the technology we need to get off this road to disaster is already at hand
