Skills and the Labor Market in a New Era Ignacio Apella, Rafael Rofman, Helena Rovner, 2020-03-09 Uruguay faces medium and long term challenges associated with two global megatrends population aging and technological change These two megatrends have been developing for some time but policy responses have been late or inadequate in many cases Trying to delay them by promoting higher fertility or enforcing restrictions on the adoption of new technologies would probably be ineffective but also ill advised as these trends are generating important opportunities to increase production and welfare The objective of this book is to identify these opportunities as well as the challenges that population aging and technological change pose for the Uruguayan economy and to determine how they can be addressed through better designed public policies with a focus on the development of new skills that increase workers productivity

Inside Indian Schools Vimala Ramachandran, 2018-03-05 After 70 years after independence the tragic reality of Indian schools is that who we are where we live how much we earn and our gender influences the kind of education we will get In this collection of essays the author explores the contours of a school system that is facing a crisis of legitimacy While India aspires to march towards a knowledge driven society and economy millions of young people are left behind Those who can afford march out of government schools only to realize that the private schools are no better The schools they attend leaves them with little knowledge or skill a very low self esteem and a bleak future This book argues that the struggle for equality in education is ultimately a struggle for quality both being two sides of the same coin Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

The Impact of Parental Employment Dr Linda Cusworth, 2012-12-28 In this groundbreaking study Linda Cusworth explores the impact of parental employment or unemployment on the educational and emotional well being of their children Using theoretical apparatus from Bourdieu and data from the youth survey of the British Household Panel Study the research in this book analyzes the impact of parental employment on those born between 1978 and 1990 This study is unique in going beyond the educational achievement and later patterns of employment of the young people studied to look at the whole of children s lives including

their attitudes and aspirations relationships and emotional well being The changed norms of maternal employment and the substantial increase in lone parenthood over the last few decades make this an especially important study both for academics in social and public policy and sociology and for policy makers *Feminist Collections* ,2005 **Compendium** Uganda. Equal Opportunities Commission,2018 *World Development Report 2007* Emmanuel Jimenez,World Bank,2006 Developing countries which invest in better education healthcare and job training for their young people between the ages of 12 and 24 years of age could produce economic growth and sharply reduced poverty With 1.3 billion young people now living in the developing world the largest ever youth group in history the report says there has never been a better time to invest in youth because they are healthier and better educated than previous generations and they will join the workforce with fewer dependents because of changing demographics The report says that young people make up nearly half of the ranks of the world's unemployed and as for example in the Middle East and North Africa region must create 100 million jobs by 2020 in order to stabilize its employment situation Moreover surveys of young people in East Asia and Eastern Europe and Central Asia carried out as research for the report indicate that access to jobs along with physical security is their biggest concern Far too many young people some 130 million 15-24 year olds cannot read or write Secondary education and skill acquisition make sense only if primary schooling has been successful This is still far from being the case and efforts have to be reinforced in this area In addition more than 20 percent of firms in countries such as Algeria Bangladesh Brazil China Estonia and Zambia rate poor education and work skills among their workforce Overcoming this handicap starts with more and better investments in youth The report highlights three areas to promote better investment in the future expanding opportunities enhancing capabilities and providing second chances Expanding opportunities focuses on increasing the quality of education smoothing the transition to work and providing young people with a platform for civic engagement Enhancing capabilities involves making young people aware of the consequences of their actions especially consequences that will affect them much later in life as well as building their decision making skills and giving them the right incentives Providing second chances calls for helping young people recover from missed opportunities through remedial education retraining treatment and rehabilitation **Minnesota Applied Economist** ,2004 **Vertical File Index** ,2005 *Children, Families, and Foster Care* ,2004 *Environmental Challenges in the Pacific Basin, Volume 1140* David O. Carpenter,2008-10-13 This volume addresses issues related to the threats to human health from exposure to environmental pollutants in the Pacific Region including how to reduce the production of such pollutants and remove or destroy them when they are produced It specifically explores how to monitor levels of exposure in human populations and how to evaluate the health consequences of these exposures Chapters explore the relationships between air quality and asthma environmental contamination and breast cancer mercury and neurobehavioral problems and present information on new technologies for hazardous substance remediation NOTE Annals volumes are available for sale as individual books or as a journal For information on institutional
