Klaus von Lampe, 2015-07-16 Organized Crime: Analyzing Illegal Activities, Criminal Structures, and Extra-legal Governance provides a systematic overview of the processes and structures commonly labeled organized crime, drawing on the pertinent empirical and theoretical literature primarily from North America, Europe, and Australia. The main emphasis is placed on a comprehensive classificatory scheme that highlights underlying patterns and dynamics rather than particular historical manifestations of organized crime. Esteemed author Klaus von Lampe strategically breaks the book down into three key dimensions: 1) illegal activities, 2) patterns of interpersonal relations that are directly or indirectly supporting these illegal activities, and 3) overarching illegal power structures that regulate and control these illegal activities and also extend their influence into the legal spheres of society. Within this framework, numerous case studies and topical issues from a variety of countries illustrate the meaningful application of the conceptual and theoretical discussion. *Basic Mathematics for Economics, Business and Finance* EK Ummer, 2012-03-15 This book can help overcome the widely observed math phobia and math aversion among undergraduate students in these subjects. The book deals with topics right from high school mathematics to relatively advanced areas of integral calculus, covering in the middle the topics of linear algebra, differential calculus, classical optimization, linear and nonlinear programming, and game theory. Though the book directly caters to the needs of undergraduate students in economics, business, and finance, graduate students in these subjects will also definitely find the book an invaluable tool, as a
