

## Bosco's Training

My new puppy Bosco is a wild terror. I want to teach him all the basic skills of a well-behaved puppy. There is no way I can afford obedience school, so I decide to use the techniques I learned in my Psy 360 class to train him. I need to start with something simple, let's say, teaching him to roll-over. Those handy little doggy treats will be useful here.

I tell Bosco to roll over. Immediately after he does, I give him a treat.

Take a look at the contingency diagram. Pay close attention because eventually we'll be asking you to diagram your own example.

Refer back to this diagram for the next set of questions.

4. The Behavior Test – If you keep your eye on the behavior, you are less likely to make mistakes. Who is the behavior? Who is doing the behavior?  
A. Bosco  
B. Me
5. The Receiver Test – Is the behavior the receiver of the outcome?  
A. Yes – Bosco is the receiver of the treat.  
B. No – Bosco is not the receiver of the treat.
6. Specific-Behavior Test – Is it perfectly clear exactly what action is involved in the behavior?  
A. Yes – Rolling over is the action involved in the behavior.  
B. No – Rolling over is not a specific behavior.
7. Dead-Man Test – If a dead man can do it, it isn't behavior. Can a dead man roll over?  
A. Yes  
B. No

Note: Yeah, I know a dead man could probably roll over if someone pushed him, but we're talking about an independent behavior here!

8. Action Test – Does the behavior involve an action?  
A. Yes – Rolling over is an action  
B. No – Rolling over is not an action

9. Response-Unit Test – Are there any interruptions of greater than 60 seconds during the response (Bosco rolling over)?  
A. Yes – There are interruptions greater than 60 seconds  
B. No – There are no interruptions of greater than 60 seconds.
10. Related Outcomes Test – Is the before condition opposite of, or at least related to the after condition?  
A. Yes – The before condition is opposite of the after condition  
B. No – The before condition is not the opposite of the after condition.
11. Sixty Second Test – Does the outcome follow the response by more than 60 seconds?  
A. Yes – The outcome follows the response by more than 60 seconds  
B. No – The outcome does not follow the response by more than 60 seconds.
12. Causality – Is the outcome caused by the response?  
A. Yes – I gave Bosco the biscuit because he rolled over.  
B. No – I would have given Bosco the biscuit whether or not he rolled over.
13. Stimulus Test – Is the outcome a stimulus, event or condition?  
A. Yes – A biscuit is a stimulus, event, or condition  
B. No – A biscuit is not a stimulus, event or condition.

Congratulations! You have just worked through an example that meets all the criteria of a behavioral contingency. All of your examples in this class should meet them as well.

14. The presentation of the biscuit will \_\_\_\_\_ the frequency of Bosco rolling over.  
A. increase  
B. decrease  
C. have no effect on
15. Incidentally, is this a reinforcement contingency?  
A. Yes  
B. No.

(Be sure to keep the meaning of a reinforcement contingency in mind.)

# Chapter Reinforcement

**Lei Huang**

## **Chapter Reinforcement:**

Thank you unconditionally much for downloading **Chapter Reinforcement**. Maybe you have knowledge that, people have seen numerous periods for their favorite books considering this Chapter Reinforcement, but stop up in harmful downloads.

Rather than enjoying a fine book afterward a mug of coffee in the afternoon, on the other hand they juggled taking into account some harmful virus inside their computer. **Chapter Reinforcement** is welcoming in our digital library an online right of entry to it is set as public appropriately you can download it instantly. Our digital library saves in fused countries, allowing you to acquire the most less latency time to download any of our books in the manner of this one. Merely said, the Chapter Reinforcement is universally compatible following any devices to read.
