  - d. What costs are associated with these issues?
2. What are the current approaches and possible solutions to specific health and safety problems affecting transit employees?
  - a. Where and how are they used?
  - b. What resources are involved?
  - c. What impacts do these approaches and solutions have on health and related safety issues?

The second phase incorporated information pulled from public records or provided by agencies, human resources records, insurance company records, and interviews with administrative, human resources, and health promotion program personnel. Additional research questions addressed during the second phase were:

3. What tools and techniques can be used for measuring program costs, benefits, and effectiveness?
  - a. Who benefits and who pays?
  - b. What are the costs, and how are they measured?
  - c. What are the benefits, and how are they measured?
