

# API Recommended Practice 2D

## Operation and Maintenance of Offshore Cranes

SEVENTH EDITION (REVISION 2014) 12010000-1 ENHANCED PRODUCT NO. 940007

This recommended practice addresses general principles for the safe installation and maintenance of offshore production-related lifting systems on fixed or floating offshore platforms, offshore support vessels, jack-up drilling rigs, semi-submersible drilling rigs and other types of mobile offshore drilling units (MODUs). This document also provides recommendations and instructions for personnel working on craning, derrick operations and lifting of heavy-lift cranes that are installed offshore.

These applications (as follows) are not covered by this document:

- a) Offshore oil exploration and production applications. These cranes are typically mounted on a fixed structure, platform, structure, floating platform, structure, or ship-shaped vessel used in drilling and production operations for offshore oil and gas wells.
- b) Offshore applications. Fixed lifting devices (rated for 20,000 lbs (9072 kg) or more) are mounted on surface-lift vessels and are used to move, transport, hoist, lower, raise, stow, store, process, collect, separate, and other materials on the vessel, between vessels, and (in the case of oil rigs and MODUs) between applications across the rig deck.
- c) Floating applications. Cranes for floating applications are included on barges, self-unloading vessels or other vessels, and are used in construction and heavy operations above and below the sea surface.

Equipment as a result of such testing used only for routine lifting operations (as loads or the deck) are not included in the scope of this recommended practice.

Lifting devices not covered by this document should be applied, installed, and maintained in accordance with the manufacturer's recommendations.
