**International Handbook of Underwater Archaeology** Carol V. Ruppe, Jane F. Barstad, 2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs [Eighth International Symposium "Monitoring of Mediterranean Coastal Areas. Watts, 1981      **Building for Eternity** C.J. Brandon, R.L. Hohlfelder, M.D. Jackson, J.P. Oleson, 2014-08-29 One marker of the majesty of ancient Rome is its surviving architectural legacy the stunning remains of which are scattered throughout the circum-Mediterranean landscape Surprisingly one truly remarkable aspect of this heritage remains relatively unknown There exists beneath the waters of the Mediterranean the physical remnants of a vast maritime infrastructure that sustained and connected the western world's first global empire and economy The key to this incredible accomplishment and to the survival of structures in the hostile environment of the sea for two thousand years was maritime concrete a building material invented and then employed by Roman builders on a grand scale to construct harbor installations anywhere they were needed rather than only in locations with advantageous geography or topography This book explains how the Romans built so successfully

in the sea with their new invention The story is a stimulating mix of archaeological geological historical and chemical research with relevance to both ancient and modern technology It also breaks new ground in bridging the gap between science and the humanities by integrating analytical materials science history and archaeology along with underwater exploration The book will be of interest to anyone interested in Roman architecture and engineering and it will hold special interest for geologists and mineralogists studying the material characteristics of pyroclastic volcanic rocks and their alteration in seawater brines The demonstrable durability and longevity of Roman maritime concrete structures may be of special interest to engineers working on cementing materials appropriate for the long term storage of hazardous substances such as radioactive waste A pioneering methodology was used to bore into maritime structures both on land and in the sea to collect concrete cores for testing in the research laboratories of the CTG Italcementi Group a leading cement producer in Italy the University of Berkeley and elsewhere The resulting mechanical chemical and physical analysis of 36 concrete samples taken from 11 sites in Italy and the eastern Mediterranean have helped fill many gaps in our knowledge of how the Romans built in the sea To gain even more knowledge of the ancient maritime technology the directors of the Roman Maritime Concrete Study ROMACONS engaged in an ambitious and unique experimental archaeological project the construction underwater of a reproduction of a Roman concrete pier or pila The same raw materials and tools available to the ancient builders were employed to produce a reproduction concrete structure that appears to be remarkably similar to the ancient one studied during ROMACONS fieldwork between 2002 2009 This volume reveals a remarkable and unique archaeological project that highlights the synergy that now exists between the humanities and science in our continuing efforts to understand the past It will quickly become a standard research tool for all interested in Roman building both in the sea and on land and in the history and chemistry of marine concrete The authors also hope that the data and observations it presents will stimulate further research by scholars and students into related topics since we have so much more to learn in the years ahead
