**Reassessing the convergence thesis. An analysis of the 2018/2019 Corporate Governance Codes of the United Kingdom and Germany** Thomas Böhm, 2019-11-08 Doctoral Thesis Dissertation from the year 2019 in the subject Law Civil Private Trade Anti Trust Law Business Law grade A University of Edinburgh Edinburgh Law School course Dissertation in Law language English abstract This paper presents a reassessing the convergence thesis It takes the adoption of the new German Corporate Governance Code 2019 GCGC as an opportunity to verify the thesis whether signs of convergence of contrasting corporate governance systems towards a single model are evident For this purpose a comparative analysis of the GCGC and the UK Corporate Governance Code 2018 UKCGC is conducted The UKCGC and the GCGC originate from competing corporate governance systems the UK enlightened shareholder value model and the German stakeholder model so the two Codes are ideally suited for a comparative analysis to verify the convergence thesis It shows that the advancing globalization has generally contributed to a shift towards an Anglo American corporate governance pattern in European countries Convergence is also attributable to the harmonization of national laws through EU legislation The comparative analysis of the UKCGC and the GCGC reveals broad signs of convergence with a large number of similar corporate governance mechanisms and provisions Nevertheless there are still region specific differences in the Corporate Governance

Codes that can be traced to the underlying corporate governance philosophy However board practice demonstrates that the structural differences between the two corporate governance systems are blurring The comparative analysis also illustrates that the Corporate Governance Codes are converging from both sides *Forthcoming Books* Rose Army,1984
