Chemistry A Novel Textbook Volume 1:

Chemistry R. Mark Matthews, 2012-12-06 The first of a two volume textbook for college General Chemistry students this book takes a novel approach on two fronts It s written and formatted in a way that encourages it be read just like any other book while also eschewing many of the traditional tropes of traditional chemistry textbooks Figures graphs and tables are embedded within the text itself usually without labels or captions in an attempt to keep the narrative flow going Similarly sample calculations are presented in a step by step fashion to mimic how an instructor would guide a student through a problem if he or she were doing it in person
