### Part A: Overview of Stata

#### I. Reading Data

- `use`  
Read data that have been saved in Stata format.
- `infile`  
Read raw data and “dictionary” files.
- `import`  
Read spreadsheets saved as “CSV” files from a package such as Excel.

#### II. Do Files

- **What is a do file?**  
A “do” file is a set of commands just as you would type them in one-by-one during a regular Stata session. Any command you use in Stata can be part of a do file. Do files are very useful, particularly when you have many commands to issue repeatedly, or to reproduce results with minor or no changes.

Example: `cd4-readin.do`

```
* Read in cd4 raw data and create stata data set.

*==
cap clear * replace
use primary.dta
*file name not yet given, using default name cd4

gen timeyear = round(year*100,25,2)
compress

label var id      "subject ID"
label var time    "year since measurement"
label var timeyear "year since measurement"
label var age     "age (years relative to arbitrary origin)"
label var packes  "packets of cigarettes smoked per day"
label var drugs   "number of medical prescriptions"
label var weight  "weight of animal purchased"
label var cost    "deposition score relative to arbitrary origin"

save cd4, replace

clear
cap noexec
```

You can edit a do file anywhere then save as a file with the extension “.do”. In Windows or Mac, you can type `doedit` in Stata to edit any do files.

The ventricular-subventricular zone: a source of oligodendrocytes in the adult brain Oscar Gonzalez-Perez, Jose Manuel Garcia-Verdugo, Adan Aguirre, 2014-09-30 Demyelinating diseases are characterized by an extensive loss of oligodendrocytes and myelin sheaths from axolemma which commonly result in disability in young adults To date there is no effective treatment against these neurological disorders In the adult brain there are neural stem cells NSCs that reside within a niche denominated ventricular subventricular zone V SVZ in the lateral wall of the cerebral ventricles NSCs give rise to neurons and oligodendrocytes that help preserve cellular homeostasis Growing evidence indicates that V SVZ progenitor cells may represent an endogenous source of oligodendrocytes that can be useful to treat demyelinating diseases This e Book The ventricular subventricular zone as a source of oligodendrocytes in the adult brain collected the most recent evidence regarding the mechanisms that modulate the proliferation migration quiescence cell fate choices and survival of oligodendrocyte precursors generated in the V SVZ Herein we compiled information about the role of Sonic hedgehog NMDA receptors ErbB proteins hemopressin erythropoietin osmolarity and microglia in the oligodendrocyte production Some chapters also describe the role of oligodendrocyte precursors in the preservation of cellular homeostasis aging and white matter repair All these information is presented as novel research findings short communications and review articles which were written by experts in the field of oligodendrocyte generation myelin production and white matter re myelination

**Applied Longitudinal Data Analysis for Epidemiology** Jos W. R. Twisk, 2013 This book discusses the most important techniques available for longitudinal data analysis from simple techniques such as the paired t test and summary statistics to more sophisticated ones such as generalized estimating of equations and mixed model analysis A distinction is made between longitudinal analysis with continuous dichotomous and categorical outcome variables The emphasis of the discussion lies in the interpretation and comparison of the results of the different techniques The second edition includes new chapters on the role of the time variable and presents new features of longitudinal data analysis Explanations have been clarified where necessary and several chapters have been completely rewritten The analysis of data from experimental studies and the problem of missing data in longitudinal studies are discussed Finally an extensive overview and comparison of different software packages is provided This practical guide is essential for non statisticians and researchers working with longitudinal data from epidemiological and clinical studies Provided by publisher
