

Introduction to Networks (Version 6.0) - ITN Practice Skills Assessment - PT

A few things to keep in mind while completing this activity:

1. Do not use the browser Back button or close or reload any exam windows during the exam.
2. Do not close Packet Tracer when you are done. It will close automatically.
3. Click the Submit Assessment button in the browser window to submit your work.

Introduction

In this assessment, you will configure devices in an IPv4/IPv6 network. For the sake of time, you will not be asked to perform all configurations on all network devices as you may be required to do in a real network or other assessment. Instead, you will use the skills and knowledge that you have learned in the labs in this course to configure the Building 1 router. In addition, you will address the hosts on two LANs with IPv4 and IPv6 addresses, activate and address the management interface of the Second Floor Switch, and back up a device configuration to a TFTP server.

You will receive one of several topologies.

You are not required to configure the First Floor Switch, and you will not be able to access it in this practice skills assessment activity.

All IOS device configurations should be completed from a direct terminal connection to the device console. In addition, many values that are required to complete the configurations have not been given to you. In those cases, create the values that you need to complete the requirements. For values that have been supplied to you, they must be entered exactly as they appear in order for you to get full credit for your configuration.

You will practice and be assessed on the following skills:

- Configuration of initial IOS device settings
- Design and calculation of IPv4 addressing
- Configuration of IOS device interfaces including IPv4 and IPv6 addressing when appropriate
- Addressing of network hosts with IPv4 and IPv6 addresses.

Working at a Small-to-Medium Business or ISP, CCNA Discovery Learning Guide Allan Reid, Jim Lorenz, 2008-04-28. Working at a Small to Medium Business or ISP CCNA Discovery Learning Guide is the official supplemental textbook for the Working at a Small to Medium Business or ISP course in the Cisco Networking Academy CCNA Discovery curriculum, version 4.1. The course, the second of four in the new curriculum, teaches networking concepts by applying them to a type of network you might encounter on the job in a small to medium business or ISP. After successfully completing the first two courses in the CCNA Discovery curriculum, you can choose to complete the CCENT Cisco Certified Entry Network Technician certification exam, which would certify that you have developed the practical skills required for entry-level networking support positions and have an aptitude and competence for working with Cisco routers, switches, and Cisco IOS Software. The Learning Guide, written and edited by instructors, is designed as a portable desk reference to use anytime, anywhere, to reinforce the material from the course and organize your time. In addition, the book includes expanded coverage of CCENT/CCNA exam topics. The book's features help you focus on important concepts to succeed in this course:

- Chapter Objectives:** Review core concepts by answering the focus questions listed at the beginning of each chapter.
- Key Terms:** Refer to the lists of networking vocabulary introduced and highlighted in context in each chapter. The Glossary defines each key term.
- Summary of Activities and Labs:** Maximize your study time with this complete list of all associated exercises at the end of each chapter.
- Check Your Understanding:** Evaluate your readiness with the end-of-chapter questions that match the style of questions you see in the online course quizzes. The answer key explains each answer.
- Challenge Questions and Activities:** Apply a deeper understanding of the concepts with these challenging end-of-chapter questions and activities. The answer key explains each answer.
- Hands-on Labs:** Master the practical hands-on skills of the course by performing all the tasks in the course labs and additional challenge labs included in Part II of the Learning Guide. Allan Reid is the curriculum lead for CCNA and a CCNA and CCNP instructor at the Centennial College (CATC) in Toronto, Canada. Jim Lorenz is an instructor and curriculum developer for the Cisco Networking Academy.
