Marine Environmental Biology and Conservation Daniel W. Beckman, 2013 Marine Environmental Biology and Conservation provides an introduction to the environmental and anthropogenic threats facing the world's oceans and outlines the steps that can and should be taken to protect these vital habitats. It begins with a brief overview of the essentials of marine biology and oceanography necessary to understand the conservation material. The book then moves through the different habitats in the marine environment such as coastal ecosystems, the open ocean, and the deep sea, exploring the organisms that live there and what conservation dangers and solutions affect these areas. *The Trainable Cat* John Bradshaw, Sarah Ellis, 2016-09-13 I have to hand it to Bradshaw and Ellis. Once you suss out their basic cat training philosophy, their methods totally work. Slate. We often assume that cats can't be trained and don't need to be. But in *The Trainable Cat*, bestselling anthrozoologist John Bradshaw and cat expert Sarah Ellis show that cats absolutely must be trained in order to enrich the bond between pet and owner. Full of training tips and exercises from introducing your cat to a new baby to helping them deal with visits to the vet, *The Trainable Cat* is the essential cat bible for cat owners and lovers. I doubt you'll find a more well-informed or scientific book on cats that better shows you how feline thinking works. Times UK
