The Complete Textbook of Veterinary Nursing Victoria Aspinall, 2011-01-01 The Complete Textbook of Veterinary Nursing has established itself as a recommended standard text for all veterinary nurses. It is designed both to satisfy the requirements of the syllabus studied by all student veterinary nurses and to provide a wide range of information for qualified nurses working in veterinary practice. This new second edition has been updated and revised to align it perfectly with the needs of a new generation of students. Comprehensive content endorsed by all leading course providers. Full colour illustrations for maximum clarity. Written by veterinary nurses for veterinary nurses. Additional online resources to maximize learning potential. Improved website offers a range of film clips of essential procedures introduced and narrated by Victoria Aspinall plus comprehensive test yourself questions in both study and assessment modes. All chapters revised and updated in line with changes in legislation, knowledge and current practical techniques. Brand new chapters on Ethics and Welfare, Communication and Physiotherapy. New section on Nursing Care Models to provide veterinary nurses with the necessary information to use this concept in their own practices. Dog behaviour chapter updated and revised to reflect the latest thinking about the process of domestication of the dog and its relevance to training methods. Additional photographs added throughout for enhanced understanding and clarity. Entire text accessible as an e-book with full note making, referencing and search functionality.

Principles of Life David M. Hillis, 2012 For sample chapters a video interview with David Hillis and more information visit www.whfreeman.com/hillispreview. Sinauer Associates and W H Freeman are proud to introduce Principles of Life. Written in the spirit of the reform movement that is reinvigorating the introductory majors course. Principles of Life cuts through the thicket of excessive detail and factual minutiae to focus on what matters most in the study of biology today. Students explore the most essential biological ideas and information in the context of the field's defining experiments and are actively engaged in analyzing research data. The result is a textbook that is hundreds of pages shorter and significantly less expensive than the current majors introductory books.
