Parental Liability in EU Competition Law Peter Whelan,2023-08-10 In enforcing EU competition law the Commission employs a unique doctrine of parental antitrust liability it imposes fines on the parent company of an infringing subsidiary in cases where the parent exercises decisive influence over the subsidiary s commercial policy Critics of this contentious aspect of EU competition law believe that the doctrine is unfair ineffective

obscure disproportionate contrary to due process and based upon a dubious if not extremely flimsy justificatory foundation Such criticism raises serious and unanswered questions about the legitimacy of the Commission s efforts to enforce competition law Parental Liability in EU Competition Law A Legitimacy Focused Approach is the first monograph to be dedicated to this controversial topic Written by Professor Peter Whelan the book contends that although the general concept of parental liability can be justified in principle the current EU level doctrine of parental antitrust liability in fact suffers from a distinct and problematic lack of legitimacy More specifically the said doctrine displays significant deficiencies with respect to effectiveness fairness and legality Given this undesirable state of affairs Parental Liability in EU Competition Law offers a fully rationalised reformulated approach to parental antitrust liability for EU competition law violations that is built around the notion of parental fault That approach provides a solid normative account of how to impose parental antitrust liability in a manner that is theoretically robust effective in practice fair in substance and legally sound **Lotka-Volterra-approach to**

Collective Dynamics: Topics on Competition and Cooperation in the Biosciences L.M. Ricciardi, Aniello Buonocore, Enrica Pirozzi, 2008-07-16 All papers have been peer reviewed The Conference was a program of invited lectures and selected contributed papers of interest to academic communities educators and students both at graduate and undergraduate levels Topics are centered on information processing and coding in the brain and in neuronal systems on quantitative approaches to ecology and population dynamics and on bioinformatics Some talks also focus on current problems in various other areas of applications of mathematics and computational tools to the life sciences *Experimentalist Competition Law and the*

Regulation of Markets Yane Svetiev, 2020-11-26 This book charts the emergence of experimentalist governance in the implementation of EU competition law as a response to uncertainty and the limits of hierarchical enforcement in an increasingly dynamic and heterogeneous economic environment It contributes to ongoing debates about the current state of EU competition law and provides an innovative account of emergent enforcement trends and its future direction It also argues that an experimentalist evolution of competition law and market regulation attenuates concerns about the competitive strictures of EU law on national economic and regulatory institutions Through its focus on experimentalist governance the book provides guidance on completing experimentalist infrastructures for market regulation as well as on the role of courts in triggering and sustaining experimentalist solutions As such it offers a novel perspective on implementing competition law in the EU and beyond **IEEE/IFAC Joint Symposium on Computer-Aided Control System Design** Sven Erik
