## Cw And Doppler Radar Radars Vol 7:

**Fundamentals of Short-range FM Radar** Igor V. Komarov, Sergey M. Smolskiy, 2003 Here s a unique new resource that offers you a solid understanding of the fundamental theory operation principles and applications of short range frequency modulated continuous wave FM CW radar You learn how to choose the structural scheme of short range FM radar and determine the optimal algorithm of useful signal processing necessary for ensuring the technical characteristic of radar Moreover this practical reference shows you how to ensure the minimum level of radar signal parasitic amplitude calculate modulation signal distortion and compensate for nonlinear distortion Signal Processing in Noise Waveform Radar Krzysztof Kulpa, 2013-07-01 This book is devoted to the emerging technology of noise waveform radar and its signal processing aspects It is a new kind of radar which use noise like waveform to illuminate the target The book includes an introduction to basic radar theory starting from classical pulse radar signal compression and wave radar The book then discusses the properties difficulties and potential of noise radar systems primarily for low power and short range civil applications The contribution of modern signal processing techniques to making noise radar practical are emphasized and application examples are given Optimal-Peak-Sidelobe Polyphase Codes Gregory E. Coxson, Jon C. Russo, 2025-06-30 Optimal Peak Sidelobe Polyphase Code is an in depth guide to efficiently designing optimal peak sidelobe polyphase codes The search for low sidelobe polyphase codes has challenged researchers since World War II but the exponential computational complexity of the problem ensures that new insights and algorithms continue to emerge This resource provides working algorithms and computer code to find ways to build optimal peak sidelobe polyphase codes and code sets The goal of this book is to narrow the focus to optimal polyphase codes so as to give a practical limit to the topic and then to provide readers with the most valuable insights and most efficient algorithms available Given the demanding timelines of radar and communication system development this book serves as a practical guide to implementing efficient search methods without starting from scratch Readers will encounter intriguing connections to Algebraic Group Theory Combinatorics and advanced mathematical techniques that drive efficiency in code search and optimization Whether developing cutting edge radar waveforms or refining signal processing techniques this book delivers the tools and knowledge needed to push the boundaries of performance and efficiency Beyond radar waveform design the principles explored in this book hold significant relevance for professionals in communications radio astronomy and laser optics where signal integrity and sidelobe suppression are critical includes combinatorics quantum sensing cognitive architectures and interference mitigation in sensor systems CW and Doppler Radar David Knox Barton, 1978 **Engineering UAS Applications: Sensor Fusion, Machine Vision and Mission Management** Jesús Garcia, José M. Molina, Juan Pedro Llerena, Daniel Amigo, David Sánchez Pedroche, 2023-07-31 Unmanned aerial systems UAS have evolved rapidly in recent years thanks to advances in microelectromechanical components navigation perception and artificial intelligence allowing for a fast development of

autonomy This book presents general approaches to develop test and evaluate critical functions such as navigation obstacle avoidance and perception and the capacity to improve performance in real and simulated scenarios It provides the practical knowledge to install analyze and evaluate UAS solutions working in real systems illustrates how to use and configure complete platforms and software tools and reviews the main enabling technologies applied to develop UAS possibilities and evaluation methodology You will get the tools you need to evaluate navigation and obstacle avoidance functions object detection and planning and landing alternatives in simulated conditions The book also provides helpful guidance on the integration of additional sensors video weather meteorological and communication networks to build IoT solutions This is an important book for practitioners and researchers interested in integrating advanced techniques in the fields of AI sensor fusion and mission management and anyone interest in applying and testing advanced algorithms in UAS platforms
