

Data Analyst Interview Questions and Answers

1. Tell me about yourself.

What they're really asking: What makes you the right fit for this job?

This question can sound broad and open-ended, but it's really about your relationship with data analytics. Keep your answer focused on your journey toward becoming a data analyst. What sparked your interest in the field? What data analyst skill do you bring from previous jobs or coursework?

As you formulate your answer, try to answer these three questions:

- What excites you about data analysis?
- What excites you about this role?
- What makes you the best candidate for the job?

An interviewer might also ask:

- What made you want to become a data analyst?
- What brought you here?
- How would you describe yourself as a data analyst?

2. What do data analysts do?

What they're really asking: Do you understand the role and its value to the company?

If you're applying for a job as a data analyst, you likely know the basics of what data analysts do. Go beyond a simple dictionary definition to demonstrate your understanding of the role and its importance.

Outline the main tasks of a data analyst: identify, collect, clean, analyze, and interpret. Talk about how these tasks can lead to better business decisions, and be ready to explain the value of data-driven decision-making.

An interviewer might also ask:

- What is the process of data analysis?
