Data Structures for Computational Statistics Sigbert Klinke,1997-05-20 Data Structures for Computational Statistics S. Klinke,1997-05-20 The development of data structures for a statistical software system is treated in this book Data structures e g storage of statistical data handling of different kind of graphics are very important in designing a software system A misspecification or too narrow approach will lead to an enormous amount of reprogramming if it is possible Chapters deal with exploratory statistical techniques some statistical applications exploratory projection pursuit data structures and implementation in XploRe Examples are given with several statistical techniques e g teachware cluster analysis non parametric regression and exploratory projection pursuit **Computational Statistics** ,1994 **Causality, Correlation And Artificial Intelligence For Rational Decision Making** Tshilidzi Marwala,2015-01-02 Causality has been a subject of study for a long time Often causality is confused with correlation Human intuition has evolved such that it has learned to identify causality through correlation In this book four main themes are considered and these are causality correlation artificial intelligence and decision making A correlation machine is defined and built using multi layer perceptron network principal component analysis Gaussian Mixture models genetic algorithms expectation maximization technique simulated annealing and particle swarm optimization Furthermore a causal machine is defined and built using multi layer perceptron radial basis function Bayesian statistics and Hybrid Monte Carlo methods Both these machines are used to build a Granger non linear causality model In addition the Neyman Rubin Pearl and Granger causal models are studied and are unified The automatic relevance determination is also applied to extend Granger causality framework to the non linear domain The concept of rational decision making is studied and the theory of flexibly bounded rationality is used to extend the theory of bounded rationality within the principle of the indivisibility of rationality The theory of the marginalization of irrationality for decision making is also introduced to deal with satisficing within irrational conditions The methods proposed are applied in biomedical engineering condition monitoring and for modelling interstate conflict Statistical Learning and Data Science Mireille Gettler Summa,Leon Bottou,Bernard Goldfarb,Fionn Murtagh,Catherine Pardoux,Myriam Touati,2011-12-19 Data analysis is changing fast Driven by a vast range of application domains and affordable tools machine learning has become mainstream Unsupervised data analysis including cluster analysis factor analysis and low dimensionality mapping methods continually being updated have reached new heights of achievement in the incredibly rich data wor

Statistical Modeling Using Bayesian Latent Gaussian Models Birgir Hrafnkelsson, 2023-11-08

This book focuses on the statistical modeling of geophysical and environmental data using Bayesian latent Gaussian models The structure of these models is described in a thorough introductory chapter which explains how to construct prior densities for the model parameters how to infer the parameters using Bayesian computation and how to use the models to make predictions The remaining six chapters focus on the application of Bayesian latent Gaussian models to real examples in glaciology hydrology engineering seismology meteorology and climatology These examples include spatial predictions of surface mass balance the estimation of Antarctica's contribution to sea level rise the estimation of rating curves for the projection of water level to discharge ground motion models for strong motion spatial modeling of earthquake magnitudes weather forecasting based on numerical model forecasts and extreme value analysis of precipitation on a high dimensional grid The book is aimed at graduate students and experts in statistics geophysics environmental sciences engineering and related fields
