Understanding Decision-Making in Educational Contexts Stephanie Chitpin,2021-03-15 Understanding Decision Making in Educational Contexts presents problem cases confronting school leaders in real settings and illustrates the multiple approaches that school leaders draw upon to navigate complex and challenging decision making contexts **Math in Context** Holt, Rinehart and Winston Staff,2002-10-01 **Britannica Mathematics in Context** ,2003 **Elementary School Teachers' Mathematics Instructional Decision Making in the Context of District Mandates on Instruction** Heather Anne Martin,2008 In the current educational climate teachers in low performing schools are experiencing pressure from state and district policy makers to raise student performance on state tests Some district administrations have undertaken various measures including implementing numerous and specific mathematics content standards adopting particular curricular packages and requiring teachers to use them as their primary instructional materials and even creating pacing guides with uniform timelines for presenting lessons to students These efforts have had the cumulative effect of urging teachers to stick closely to a standard curriculum in order to raise student test scores Teachers must also interpret and attend to the needs of their students and ideally teach their students to understand mathematical concepts and processes as opposed to narrowly mastering procedural skills It may not always be possible to both follow administrative mandates about instruction and meet student needs and teachers may have to make a compromise between these two objectives In this study I examined how elementary school teachers in a particular accountability pressured school decided to teach mathematics Drawing on multiple interviews and ten classroom observations per teacher I created portraits of the mathematics instructional choices of four second grade teachers including their use of instructional materials such as textbooks I drew on an analytical framework adapted from Stein Grover and Henningsen 1996 to assess various features of the lesson in order to note the interaction between the materials and the teachers decisions about how to use them I developed a lesson signature for each teacher a visual representation of the typical organization of the teacher s lessons and how materials were used within them My findings indicated that the teachers individual goals for their teaching beliefs about their students needs and interpretations of the district s curricular mandates interacted to steer their instructional choices to very different results Two of the teachers dutifully followed the textbook while two essentially disregarded it in favor of other materials Teachers own senses of their autonomy to make curricular decisions and their support for their students autonomy in learning math emerged as important factors I suggest implications for teacher professional development and curricular materials development **Britannica Mathematics in Context** ,1997 Decision Making ,1998 **Contemporary Mathematics in Context** Arthur F. Coxford,James Taylor Fey,Christian R. Hirsch,Harold L. Schoen,Gail Burrill,Eric W. Hart,Ann E. Watkins,1998 *Contemporary Mathematics in Context: A Unified Approach, Course 3, Part B, Student Edition*

McGraw Hill, 2002-09-10 A National Science Foundation NSF funded high school series for all students Contemporary Mathematics in Context engages students in investigation based multi day lessons organized around big ideas Important mathematical concepts are developed in relevant contexts by students in ways that make sense to them Courses 1 along with Courses 2 and 3 comprise a core curriculum that upgrades the mathematics experience for all your students Course 4 is designed for all college bound students Developed with funding from the National Science Foundation each course is the product of a four year research development and evaluation process involving thousands of students in schools across the country

Contextual Management Erdener Kaynak, Raghbir S Basi, 2013-02-01 Senior executives middle managers supervisors administrators and other students of administrative behavior need to know why harnessing human energies demands a full understanding of organizational and cultural contexts combined with a knowledge of personality characteristics of self and others In response to this need *Contextual Management A Global Perspective* addresses the art of getting things done in today s organizational world It offers managers guidelines for working under a varied set of circumstances and explores ways to increase administrative effectiveness in organizations worldwide *Contextual Management* integrates different administrative levels and various organizational cultures with appropriate management styles and personal attributes to help you recognize the position context where you can be most effective Using its self assessment questions you can gauge your strengths weaknesses and requisites for particular administrative position roles and contexts You can also use tools from the book s appendix to help you assess personality attributes as well as the characteristics of a particular position context You will put your individual experiences into perspective and enhance your understanding of organizational realities as you read about individual managerial behavioral relationships organizational designs job configurations and CEO orientations recruiting placing motivating and supporting your staff identifying a particular unit s work culture and recognizing its characteristics why a supervisor must be personable to be able to carry out instructions from superiors while gaining allegiance from subordinates assuring good fits of administrative personnel in various organizational systems goals the logical stepping stones for initiating the process of implementation the constraints particular work systems place on the relationships between managers and others within an organization Appropriate styles of performance as *Contextual Management* illustrates are contextual not universal The fact that you are effective in one environment doesn t mean you will be effective in another With this book though you can change your thinking about functions of leadership decision making communication planning and implementation and realize congruence in whichever environmental niche your organization moves into next

Decision Making in a Mathematics Reform Context Kay A. Wohlhuter, 1996 This investigation of secondary geometry teachers decision making in a mathematics curricular reform context examined the following questions a What planning and interactive decisions were secondary geometry teachers making during this time of reform and b what factors influenced the decisions that these teachers made In addition

comparisons were generated between influential factors identified during a mathematics reform context and the stable context of previous decision making studies A multi case study approach involving detailed examination of five geometry teachers decision making was used The data collected and analyzed included a questionnaire interviews observational field notes audiotapes and videotapes of classroom instruction and written instructional documents Teachers profiles were created describing geometry and teaching biographies views toward curricular change the classroom planning decisions and influential factors and interactive decisions and influential factors Findings were developed by searching for similarities and differences across the sample Teachers decisions generated descriptions of their geometry courses One teacher promoted geometry as a mathematical system using predominantly a lecture approach The other four teachers advocated a multifaceted view of geometry recognizing geometry as a mathematical system and as a setting for developing communication and problem solving skills In addition the four teachers courses included references to connections between geometry and the real world These four teachers used a variety of instructional approaches that encouraged students active involvement in their geometry learning with an emphasis on developing student understanding Factors influencing teachers decisions included a past geometry experiences b professional development experiences c articulated course goals d advanced planning decisions e teachers beliefs f the geometry textbook and other materials g teachers school settings and h students needs and actions Some findings highlighted differences between this study and previous decision making studies All teachers in this study appeared to be influenced by their beliefs about the nature of geometry as a discipline Teachers were also influenced by whether they viewed the process of becoming an effective teacher as a life long process For four of the teachers reform agendas were influential as another source of curriculum ideas

Affect in Mathematical Modeling

Scott A. Chamberlin, Bharath Sriraman, 2019-06-03 In the book the relationship between affect and modeling is discussed because as educational psychologists have suggested for decades affect directly influences achievement Moreover given the importance of mathematical modeling and the applications to high level mathematics it provides the field of mathematics psychology with insight regarding affect in relation to mathematical modeling By doing so it helps determine the degree to which understanding of mathematics and understanding affect in mathematical modeling episodes may have a direct effect on cognition
