The Intelligent Breath Charles Nehme, The calendar based approach to HVAC maintenance is a relic of the past For decades facility managers have replaced air filters based on a date on a sticker often changing them too early which wastes money and material or too late which compromises indoor air quality and spikes energy consumption This book introduces a paradigm shift The Data Driven Filter By embedding passive RFID tags for identification and differential pressure sensors for

real time performance tracking we can finally treat the air filter as a dynamic component of a building's nervous system. The goal of this work is to bridge the gap between mechanical engineering and the Internet of Things (IoT) providing a technical roadmap for implementing smart filtration systems that communicate their own health. We are moving toward a future where the building breathes intelligently notifying us only when it truly needs care. **Energy Research Abstracts**, 1983
