

Ch 14: Applying Extinction

- Extinction is one of the functional treatments used to eliminate a problem behaviour
- the basic principle of extinction is eliminating the identified reinforcer of the problem behaviour
- Steps in using extinction
 1. collect data to assess treatment effects
 - record the problem behaviour before and after the use of extinction to determine when the behaviour is increased/decreased after extinction has been established
 - establish a behavioural definition
 2. identify the reinforcer for the problem behaviour through functional assessment
 - you must identify the specific reinforcer for the problem behaviour so that you can eliminate it in an extinction procedure
 - in functional assessment the antecedent and consequence of the behaviour are identified
 - using this collection of data identify which antecedent and consequence is acting as an establishing operation and reinforcer
 3. eliminate the reinforcer after each instance of the problem behaviour
 - in order to eliminate it a few things must be considered
 - have you identified the reinforcer?
 - can you eliminate the reinforcer?
 - if the change agent has no control over the reinforcer, extinction can't be implemented
 - change agent = parent, teacher, staff, the person implementing the change
 - extinction can be implemented only if the change agent can prevent the reinforcing consequence each time the problem behaviour occurs
 - is extinction safe to use?
 - its important to consider whether extinction will harm the person
 - can an extinction burst be tolerated?
 - an extinction burst is a slight increase in the problem behaviour before it declines
 - the change agent must be aware of the extinction burst, and must be able to withhold from reinforcing the behaviour
 - can consistency be maintained?
 - for extinction to be implemented correctly, the reinforcer must never follow the problem behaviour
 - meaning all people involved must be consistent in eliminating the behaviour
 - all change agents must be trained to use the procedure correctly
