of Malignant Narcissism offers a unique insight into malignant narcissism exploring both its personal and professional

relevant clinical material including an analysis of Wood s relationships with his own parents Wood presents vignettes  
illustrating the core dynamics that drive narcissism illustrated with sections of his father s unpublished autobiography and  
with his patient work The book makes the case for malignant narcissism to be considered a subtype of psychopathy and puts  
forth a framework setting out the key dynamics that typify these individuals including consideration of the ways in which  
malignant narcissism replicates itself in varied forms Finally Wood examines the impact of narcissistic leadership and  
compares his theoretical position with those of other clinicians This book will be of interest to clinical psychologists

theatre music art humanitarian initiatives moon landings and space exploration mythology science they all require a large dose of imagination We all live surrounded by the results of the imagination of our peers and the creations of our ancestors Without imagination there is no compassion no moral compass and no progress But without imagination there is also no fear of death There are no premeditated murders or terrorist attacks these rely on the human ability to imagine to call up images and test drive possible scenarios in the human mind Once we get out the magnifying glass we discover that the imagination is a double edged sword All of us together humanity as a collective are creating very confused and mixed outcomes world peace remains elusive wars rage and children starve Addictions and pollution proliferate Medicine of the Imagination Dwelling in Possibility examines these issues and suggests that if we are to transcend religious wars homophobia and medical cures worse than the diseases we face then it that it is our moral duty to engage our imagination in service to other people

The past decades have seen an alarming increase in campus crime alcohol abuse by college students hazing and other risky student activities There is a growing awareness of the need to make safer college campuses While danger to students has been on the rise the relationships between students and their universities has grown increasingly distant The rise in danger and the loss of community on college campuses has been inadvertently facilitated by legal rules Courts crafted legal protections for colleges which backfired legal rules designed to protect colleges from lawsuits instead encouraged colleges to become insular and to avoid positive steps to protect student safety Bickel and Lake re imagine the role of law in university student relations Picking up on recent court decisions and legislative initiatives the authors describe a new legal paradigm for college safety the facilitator university The modern college is not a baby sitter or custodian of students but it is also not a mere bystander to student safety The facilitator university balances the rights and responsibilities of students and institutions and envisions campuses which feature shared responsibility for student safety Law can be a positive tool for improving safety and community on modern campuses This work is a significant contribution to the law of student safety It reconciles the best advice of a university lawyer with the best instincts of an experienced student affairs administrator Paul J Ward Arizona State University and Former President National Association of College and University Attorneys and Christine K Wilkinson Vice President for Student Affairs Arizona State University By now it is probably obvious to college counselors and psychotherapists why this book will be immensely relevant and essential to their professional work It contains valuable legal and historical information that can provide context and guidance in their direct work with student clients and it is a bright beacon that can inform and illuminate their consultation services with colleagues I recommend it to readers unqualifiedly
