concept of connectivity vis vis six themes mentioned above in watershed sciences and the Earth's critical zone and its underlying theoretical assumptions 2 New approaches including machine learning and artificial intelligence that make use of a spectrum of data sources to quantify connectivity and the interactions between different types of connectivity 3 Novel frameworks making use of the broad concepts of connectivity in watershed and reactive transport models to understand hydrobiogeochemical dynamics and predict transient export of water nitrogen carbon and metals 4 Frameworks to quantify uncertainty and address inherent data challenges for diverse connectivity aspects collapse [Mathematical Reviews](#) ,1995
