Der Schwarm Roman:

The Swarm: A Novel of the Deep Frank Schätzing, Frank Schätzing, 2012-03-01 Frank Schätzing's amazing novel is a publishing phenomenon with translation rights sold around the world drawing rave reviews for both pulsating suspense and great scientific knowledge. The world begins to suffer an escalating and sensational series of natural disasters and two marine biologists begin to develop a theory that the cause lies in the oceans where an entity known as the Yrr has developed a massive network of single cell organisms. It is wreaking havoc in order to prevent humankind from destroying the earth's ecological balance forever. The Americans under the ruthless General Judith Lee take a more pragmatic approach than the scientists seeking to wipe out the being of the deep. The scene is set for a massive confrontation. *The Swarm* Frank Schätzing, 2009-03-17 Now a CW Original Series. The Der Spiegel number 1 blockbuster bestseller about an intelligent life force that takes over the oceans and exacts revenge on mankind. Whales begin sinking ships. Toxic eyeless crabs poison Long Island's water supply. Around the world countries are beginning to feel the effects of the ocean's revenge. In this riveting novel full of twists, turns and cliffhangers, a team of scientists discovers a strange intelligent life force called the Yrr that takes form in marine animals in order to wreak havoc on man for his abuses. *The Day After Tomorrow* meets *The Abyss* in his gripping scientifically realist, utterly imaginative thriller. With the compellingly creepy and vivid skill of this author to evoke story character and place, Frank Schätzing's book is certain to find a home with fans of Michael Crichton. **The Swarm** Frank Schätzing, 2007-08-01 *The Swarm* which set off a frenzy in German bookstores is the 1 international bestseller about an intelligent life force that takes over the oceans and exacts revenge on mankind. Ecological Thought in German Literature and Culture Gabriele Duerbeck, Urte Stobbe, Hubert Zapf, Evi Zemanek, 2017-10-16 The volume offers a survey of the contribution of German literature and culture to the evolution of ecological thought. As the field of ecocritical theory and practice is rapidly expanding towards transnational and global dimensions, it seems nevertheless necessary to consider the distinct manifestations of ecological thought in various cultures. In this sense, the volume demonstrates in twenty-six essays from different disciplines how German literature, philosophy, art, and science have contributed in unique ways to the emergence of ecological thought on national and transnational scale. The volume maps the most important and characteristic of these developments both on a theoretical and on a textual analytical level. It is structured in five parts ranging from proto-ecological thought since early modern times (part I) to major theoretical approaches (part II), environmental history (part III), and ecocritical case studies (part IV) to ecological visions in different media and art forms (part V). The four editors have widely published and are actively involved in ecocritical literary and cultural studies. The group of editors consists of two scholars of German literature and cultural studies: Gabriele Duerbeck and Urte Stobbe, both University of Vechta; a scholar in German and comparative literature: Evi Zemanek, University of Freiburg; as well as a scholar of Anglo-American ecoliterature and ecocriticism: Hubert Zapf. All of them are involved in various projects and research networks on ecology and literature. The

contributors of the individual chapters likewise are all experts in their respective fields ranging from German literature history environmental studies art history music and art The book is a unique and readily accessible collection of essays that is of relevance not only for a German and continental European but for a worldwide audience

The Black Mirror and Other Stories Franz Rottensteiner, 2008-12-31 Handsomely equipped with a comprehensive introductory historical essay editor's notes and selected bibliography this distinguished anthology is a model of genre research These previously untranslated stories published from 1871 onward offer reading virtually unknown to most American and many German readers Some authors combine scientific and philosophical issues like Kurd Lasswitz in his witty tale To the Absolute Zero of Existence A Story from 2371 while others as in Erik Simon's 1983 title story pose psychological puzzles involving alien phenomena Though the earlier stories in particular demand painstaking reading all of them repay it with rewarding insights into German and Austrian culture and the many possible uses and misuses of science
