Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf and the era of low oil prices. Both developments, along with dramatic demographic change, have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel, although wanting to retain ultimate authority. With contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.

Public Policy, Governance and Polarization David K. Jesuit, Russell Alan Williams, 2017-07-06 Polarization is widely diagnosed as a major cause of the decline of evidence-based policy making and public engagement-based styles of policy making. It creates an environment where hardened partisan viewpoints on major policy questions are less amenable to negotiation, compromise or change. Polarization is not a temporary situation; it is the new normal. **Public Policy, Governance and Polarization** seeks to provide a theoretical foundation for scholars and policy makers who need to understand the powerful and often disruptive forces that have arisen in Europe and North America over the past decade. Academics and practitioners need to better understand this growing trend and to find ways in which it may be managed so that policy solutions to these threats may be developed and implemented. Researchers and future policymakers in fields such as public administration, public management and public policy need to recognise how institutional design, corporatist interest group systems and different pedagogical approaches may help them understand, discuss and work beyond policy polarization. Edited by two leading political science scholars, this book aims to begin that process.

Changing the Heart of Social Policy-Making Catherine E. Johnson, 2025-07-24 Effective social policy making has been debated for decades by policy makers, scholars and the general public. As elected officials have lost sight of their purpose in a climate of extreme polarization and partisan politics, disappointment and distrust of our government institutions have swelled. This book highlights the importance of a change in the hearts and minds of legislators and provides a new perspective on addressing the public's desire for more effective and humane social policies. Covering the legislative and social policy making process from a historical and contemporary perspective, this book identifies powerful interest groups and corporate dollars which

influence our legislative process and erode sound policy ideas and solutions The book also explores a new generation of youth voters which can influence election and policy outcomes the current mental health crisis and the importance of evidence based research in designing social policies Several topics are illuminated by real life experiences case studies and practical guidelines

State of Empowerment Carolyn Barnes,2020-02-21 On weekday afternoons dismissal bells signal not just the end of the school day but also the beginning of another important activity the federally funded after school programs that offer tutoring homework help and basic supervision to millions of American children Nearly one in four low income families enroll a child in an after school program Beyond sharpening students math and reading skills these programs also have a profound impact on parents In a surprising turn especially given the long history of social policies that leave recipients feeling policed distrusted and alienated government funded after school programs have quietly become powerful forces for political and civic engagement by shifting power away from bureaucrats and putting it back into the hands of parents In State of Empowerment Carolyn Barnes uses ethnographic accounts of three organizations to reveal how interacting with government funded after school programs can enhance the civic and political lives of low income citizens [Denver journal of international law and policy](#) ,2004 [Public Policy-Making \[By\] James E. healthcare and job training for their young people between the ages of 12 and 24 years of age could produce economic growth and sharply reduced poverty. With 1.3 billion young people now living in the developing world, the largest ever youth group in history, the report says there has never been a better time to invest in youth because they are healthier and better educated than previous generations and they will join the workforce with fewer dependents because of changing demographics. The report says that young people make up nearly half of the ranks of the world's unemployed and, as for example in the Middle East and North Africa region, must create 100 million jobs by 2020 in order to stabilize its employment situation. Moreover, surveys of young people in East Asia and Eastern Europe and Central Asia carried out as research for the report indicate that access to jobs along with physical security is their biggest concern. Far too many young people, some 130 million 15-24 year olds, cannot read or write. Secondary education and skill acquisition make sense only if primary schooling has been successful. This is still far from being the case and efforts have to be reinforced in this area. In addition, more than 20 percent of firms in countries such as Algeria, Bangladesh, Brazil, China, Estonia, and Zambia rate poor education and work skills among their workforce. Overcoming this handicap starts with more and better investments in youth. The report highlights three areas to promote better investment in the future: expanding opportunities, enhancing capabilities, and providing second chances. Expanding opportunities focuses on increasing the quality of education, smoothing the transition to work, and providing young people with a platform for civic engagement. Enhancing capabilities involves making young people aware of the consequences of their actions, especially consequences that will affect them much later in life, as well as building their decision-making skills and giving them the right incentives. Providing second chances calls for helping young people recover from missed opportunities through remedial education, retraining, treatment, and rehabilitation.

Public Policymaking James E. Anderson, 2003. Praised for clear, concise writing, this text presents a process-oriented approach within a logical framework for a better understanding of each stage of policymaking. This approach exhibits policymaking as a sequence of functional activities beginning with the identification of a problem and agenda setting and concluding with evaluation, revision, or termination of a policy. Chapter 5 focuses more on budgeting strategy rather than the technical process, and Chapter 6 includes coverage of administrative agencies that play a role in public policy. Thoroughly updated examples throughout include recent events such as the 2000 election, the Bush administration, and policy responses to September 11. Each chapter includes at least one case study.

Understanding Surveillance Technologies J.K. Petersen, 2007-02-05. Understanding Surveillance Technologies demystifies spy devices and describes how technology is used to observe and record intimate details of people's lives, often without their knowledge or consent. From historical origins to current applications, it explains how satellites, pinhole cameras, cell phone and credit card logs, DNA kits, tiny microphones, bugs, chemical sniffers, and implanted RF ID chips have enabled us to create a two-edged sword: devices that promise security while at the same time eroding our privacy. Understanding Surveillance Technologies is profusely illustrated with extensive references and indexes.

laying the groundwork for more specialized texts on specific technologies It covers each of the major sensing devices and explains how they are used in civilian criminal justice scientific national security and military applications It also includes recent changes in legislation and the organization of the intelligence community and discusses how equal access to high tech sensing devices and encryption schemes has changed society Understanding Surveillance Technologies is modular so the chapters can be read in any order and is written in an accessible somewhat narrative style to suit the needs of journalists newscasters privacy organizations educators civic planners and technology centers It is appropriate as an adjunct reference for criminal justice law enforcement military and forensic trainees and as a textbook for courses in Surveillance Studies Sociology Communications and Political Science Now in its second edition with 1 000 pages and more than 700 diagrams it is still the only text that comprehensively conveys the breadth of the field
