Radar Engineering By Raju:

Radar Engineering Raju, 2013-12-30 This book contains the applications of radars fundamentals and advanced concepts of CW CW Doppler FMCW Pulsed doppler MTI MST and phased array radars etc It also includes effect of different parameters on radar operation various losses in radar systems radar transmitters radar receivers navigational aids and radar antennas Key features Nine chapters exclusively suitable for one semester course in radar engineering More than 100 solved problems More than 1000 objective questions with answers More than 600 multiple choice questions with answers Five model question papers Logical and self understandable system description Handbook of Microwave and Radar

Engineering Anatoly Belous, 2021-01-04 This comprehensive handbook provides readers with a single source reference to the theoretical fundamentals physical mechanisms and principles of operation of all known microwave devices and various radars The author discusses proven methods of computation and design development process schematic schematic technical and construction peculiarities of each breed of the microwave devices as well as the most popular and original technical solutions for radars Coverage also includes the history of creation of the most widely used radars as well as guidelines for their potential upgrading Offers readers a comprehensive systematized view of all contemporary knowledge acquired during the last 20 years on radars and related disciplines Provides a single source reference on the physical mechanisms and principles of operation of the basic components of radio location devices including theoretical aspects of designing the necessary high efficiency electronic devices and systems as well as key practical methods of computation and design Presents complex topics using simple language minimizing mathematics Sensing and Monitoring Technologies for Mines and Hazardous

Areas Swadesh Chaulya, G. M. Prasad, 2016-06-10 Sensing and Monitoring Technologies for Mines and Hazardous Areas Monitoring and Prediction Technologies presents the fundamentals of mining related geotechnical risk and how the latest advances in sensing and data communication can be used both to prevent accidents and provide early warnings Opencast mining operations involve huge quantities of overburden removal dumping and backfilling in excavated areas Substantial increases in the rate of accumulation of waste dumps in recent years has resulted in greater height of dumps and also has given rise to the danger of dump failures as steeper open pit slopes are prone to failure These failures lead to loss of valuable human lives and damage to mining machinery This book presents the most recent advances in gas sensors methane detectors and power cut off systems It also introduces monitoring of the gas strata and environment and an overview of the use of Internet of Things and cloud computing for mining sensing and surveillance purposes Targeted at geotechnical and mining engineers this volume covers the latest findings and technology to prevent mining accidents and mitigate the inherent risk of the activity Presents complete details of a real time slope stability monitoring system using wireless sensor networking and prediction technique based on multivariate statistical analysis of various parameters and analytical hierarchy process methods Discusses innovative ideas and new concepts of sensing technologies mine transport surveillance digital mining and

cloud computing to improve safety and productivity in mining industry Includes slope stability prediction software downloadable through a companion website which can be used for monitoring analyzing and storing different sensors and providing audio visual SMS and email alerts Covers the latest findings and technology to prevent mining accidents and mitigate the inherent risk *NexGen Technologies for Mining and Fuel Industries (Volume I and II)* Pradeep K. Singh,V.K. Singh,A.K. Singh,D. Kumbhakar,M.P. Roy,2017-03-06 The papers in these two volumes were presented at the International Conference on NexGen Technologies for Mining and Fuel Industries NxGnMiFu 2017 in New Delhi from February 15 17 2017 organized by CSIR Central Institute of Mining and Fuel Research Dhanbad India The proceedings include the contributions from authors across the globe on the latest research on mining and fuel technologies The major issues focused on are Innovative Mining Technology Rock Mechanics and Stability Analysis Advances in Explosives and Blasting Mine Safety and Risk Management Computer Simulation and Mine Automation Natural Resource Management for Sustainable Development Environmental Impacts and Remediation Paste Fill Technology and Waste Utilisation Fly Ash Management Clean Coal Initiatives Mineral Processing and Coal Beneficiation Quality Coal for Power Generation and Conventional and Non conventional Fuels and Gases This collection of contemporary articles contains unique knowledge case studies ideas and insights a must have for researchers and engineers working in the areas of mining technologies and fuel sciences

Advances in Communication, Devices and Networking Rabindranath Bera,Subir Kumar Sarkar,Om Prakash Singh,Hemanta Saikia,2019-02-15 The book covers recent trends in the field of devices wireless communication and networking It presents the outcomes of the International Conference in Communication Devices and Networking ICCDN 2018 which was organized by the Department of Electronics and Communication Engineering Sikkim Manipal Institute of Technology Sikkim India on 2 3 June 2018 Gathering cutting edge research papers prepared by researchers engineers and industry professionals it will help young and experienced scientists and developers alike to explore new perspectives and offer them inspirations on addressing real world problems in the field of electronics communication devices and networking
