It provides a guide to the most significant techniques developed and applied over the past decade, and includes case study case studies on 3D games and physical-based materials and lighting, global illumination, and new photo-realistic rendering algorithms to create believable scenes on low-budget PCs. Chapters on color, shadows, volumetric techniques, and advanced shading. A new chapter has been added about neural and deep learning. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals,
