

RECRYSTALLIZATION

The purpose of this experiment is to enable the student to:

1. Learn about the practical and theoretical aspects of the recrystallization process.
2. Learn how to purify an impure solid by the simple technique of recrystallization, which involves several steps:
 - (a) selecting the ideal solvent to accomplish such a purification.
 - (b) dissolving the compound in the minimum amount of appropriate solvent while "boiling" hot.
 - (c) filtering insoluble impurities while hot (if any are present).
 - (d) crystallizing the purified compound.
 - (e) isolating the pure compound by vacuum filtration.
 - (f) air drying pure compound.

Laboratory Manual of Elementary Organic Chemistry Harold Hart, Ernest Edwin Campaigne, 1950 **Multiscale**

Operational Organic Chemistry John W. Lehman, 2009 This comprehensive laboratory text provides a thorough introduction to all of the significant operations used in the organic lab and includes a large selection of traditional scale and microscale experiments and minilabs Its unique problem solving approach encourages students to think in the laboratory by solving a scientific problem in the process of carrying out each experiment The Second Edition contains a new introductory section Chemistry and the Environment which includes a discussion of the principles of green chemistry Several green experiments have been added and some experiments from the previous editions have been revised to make them greener

Cooperative Chemistry Lab Manual Cooper, 2005-02 The laboratory course described in the lab manual emphasizes experimental design data analysis and problem solving Inherent in the design is the emphasis on communication skills both written and oral Students work in groups on open ended projects in which they are given an initial scenario and then asked to investigate a problem There are no formalized instructions and students must plan and carry out their own investigations

Operational Organic Chemistry John W. Lehman, 2009 This comprehensive lab companion provides enough theory to help students understand how and why an operation works but emphasizes the practical aspects of an operation to help them perform the operation successfully in the lab The new 4th edition contains a new introductory section Chemistry and the Environment which includes a discussion of the principles of green chemistry Several green experiments have been added and some experiments from the previous editions have been revised to make them greener *The Student's Lab Companion* John W. Lehman, 2008 This comprehensive lab companion provides enough theory to help students understand how and why an operation works but emphasizes the practical aspects of an operation to help them perform the operation successfully in the lab For undergraduate or graduate students taking organic chemistry lab This comprehensive lab companion provides enough theory to help students understand how and why an operation works but emphasizes the practical aspects of an operation to help them perform the operation successfully in the lab The Second Edition makes substantive revisions of many operations to clarify existing material and add new information More environmentally friendly i e green lab experiments are encouraged Ideal for professors who write their own lab experiments or would like custom labs but need a source for lab operations and safety information

Green Organic Chemistry Kenneth M. Doxsee, James E. Hutchison, 2004 This lab text

describes the tools and strategies of green chemistry and the lab experiments that allow investigation of organic chemistry concepts and techniques in a greener laboratory setting Students acquire the tools to assess the health and environmental impacts of chemical processes and the strategies to improve develop new processes that are less harmful to human health and the environment The curriculum introduces a number of state of the art experiments and reduces reliance on expensive environmental controls such as fume hoods Provided by publisher Exercises in General, Organic, and Biological Chemistry Arne Nels Langsjoen,1973 *Experimental Organic Chemistry* Clark F.
