### **Affordable Gut Health Foods Explained:**

*The Real Cost of Cheap Food* Michael Carolan, 2024-09-11 This thought provoking accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us The author shows why today's global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to the food system the environment sustainable development health and social justice In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change vertical agriculture global pandemics geopolitical instability agriculture 4.0 alternative proteins and food justice Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual view of food when debating its affordability Expanding an innovation introduced in the second edition concrete case studies of collective mobilization can be found throughout all chapters to support a narrative that balances being critical with being hopeful This book is essential reading for those interested in critical food studies food and agriculture and a sustainable and socially just food system

**Innovation in Healthy and Functional Foods** Dilip Ghosh, Shantanu Das, Debasis Bagchi, R.B. Smarta, 2016-04-19 The focus of food science and technology has shifted from previous goals of improving food safety and enhancing food taste toward providing healthy and functional foods Today's consumers desire foods that go beyond basic nutrition foods capable of promoting better health or even playing a disease prevention role To meet this need for innovation

**Smart Food for Healthy, Sustainable and Resilient Food Systems**, 2023-06-06 We are no longer able to provide the world population with a healthy diet and at the same time sustainably balance our planetary resources to ensure resilient and viable livelihoods for smallholder farmers For the past fifty years diets have become less nutritionally balanced contribute significantly to climate change and have accelerated the process of biodiversity erosion We have reduced the number of species that are cultivated for food and for each species we are growing fewer varieties While agriculture has moved towards uniformity biodiversity is the basis of healthy and nutritious diets and biodiversity is paramount for adapting crops to climate change Hence it is important to build resilient and sustainable food systems by re-introducing diversity into our agricultural systems and introducing Smart Food from smart crops into our diets Smart Food is food that fulfills the criteria for being good for you nutritious and healthy good for the planet environmentally sustainable and beneficial to the farmers who grow these crops resilient and viable The aim of this Research Topic is to provide researchers research managers funding agencies and government agencies with scientifically backed information to foster awareness increased use and support for research into Smart Food

Nutrition and Quality of Life in the Elderly Daniela Caetano Gonçalves, Gabriela Salim de

Castro,2024-06-12 The WHO estimates that by 2050 30% of the world s population will be elderly The increased life expectancy of the population coupled with falling fertility contributes to this scenario in many countries Although the life expectancy of the population has increased the recurring concern is to ensure the quality of life of this group Some diseases are directly associated with the aging process such as sarcopenia and osteoporosis On the other hand chronic degenerative diseases such as diabetes hypertension and cancer are associated with long term inadequate health habits and therefore are more prevalent in the elderly Among the factors that contribute to a lifestyle that influences the onset of these diseases we can highlight sedentarism and poor diet quality
