CHAPTER 1 ACCOUNTING IN ACTION

CHAPTER LEARNING OBJECTIVES

1. *Explain what accounting is.* Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users.
2. *Identify the users and uses of accounting.* The major users and uses of accounting are as follows: (a) Management uses accounting information to plan, organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting information are taxing authorities, regulatory agencies, customers, labor unions, and economic planners.
3. *Understand why ethics is a fundamental business concept.* Ethics are the standards of conduct by which actions are judged as right or wrong. Effective financial reporting depends on sound ethical behavior.
4. *Explain accounting standards and the measurement principles.* Accounting is based on standards, such as International Financial Reporting Standards (IFRS). IFRS generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation.
5. *Explain the monetary unit assumption and the economic entity assumption.* The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires that the activities of each economic entity be kept separate from the activities of its owners and other economic entities.
6. *State the accounting equation, and define its components.* The basic accounting equation is:
$$\text{Assets} = \text{Liabilities} + \text{Equity}$$
