Flyers 2018 Sample Papers Cambridge English:

Investigating Attention to Form and Individual Differences: Research with EFL Children María del Pilar García Mayo, 2025-04-25 The teaching of the grammar of a second foreign language has always been an issue that different teaching methods have considered. Studies in the field of second language acquisition (SLA) have shown that mere exposure to meaningful second language input is not enough for learners to reach proficiency in the target language. At beginner proficiency levels, learners tend to rely on lexical items instead of grammatical form to obtain meaning. Recent research has pointed out the need for effective grammar pedagogy in foreign language environments in which the exposure to the language being learned is limited. The present book presents a selection of eleven empirical papers dealing with children's attention to formal aspects of the language they are learning and some of them consider the impact of individual differences on the learning process. Each of the studies reported in the individual chapters is based on a solid theoretical background and an overview of studies in the corresponding research area. This volume has been awarded the 2025 Prize for Best Edited Collection in Language Linguistics by the Asociación Española de Estudios Anglo Norteamericanos (AEDEAN). **L2**

Collaborative Writing in Diverse Learning Contexts Mimi Li, Meixiu Zhang, 2023-08-15 This book is the first edited volume to compile up-to-date scholarship that discusses frontier knowledge on second language (L2) collaborative writing (CW) and highlights technology-mediated solutions to it. The volume consists of conceptual papers and empirical studies that explore theoretical, methodological, and pedagogical approaches to CW in face-to-face, online, and hybrid learning contexts. The ten chapters of the book are divided into three sections: 1) theoretical perspectives and a methodological review of CW; 2) empirical research addressing the processes, products, and effects pertaining to CW; 3) pedagogical aspects relevant to CW, namely task design, technology use, and assessment. By examining the implementation of various CW tasks across modes, genres, and L2 learning settings, this book re-evaluates the practices of CW and illustrates how diverse forms of CW can facilitate students' L2 learning and writing development.

Tracking Language Growth in Child English Learners María Luquin, 2025-01-27 Model texts are exemplary native language texts that serve as guides for shaping language abilities. This book explores the profound impact of sustained exposure to model texts on the cultivation of children's writing skills. Bridging existing research gaps, it delves into the efficacy of written corrective feedback and model texts in language learning. Additionally, it investigates form-focused intervention alongside motivational and perceptual factors. The findings underscore the transformative influence of integrating model texts into English as a foreign language classrooms. As such, it is a perfect read for educators looking for practical tips on language development.

which reveal common and differing experiences of teaching methodologies and assessment practices learners attitudes and motivation and young learners skill development processes Together they explore the effects of language policy collaborative learning and teacher intervention on the development of children s listening and speaking skills in a second or foreign language The book will be of interest to researchers in early second language acquisition as well as students on EFL TESOL and ESL courses It will be particularly useful to pre primary and primary teachers in multilingual classrooms and can be used in teacher education and professional development programmes to promote reflection on current teaching practices
