Managing Innovation Inside Universities Randolph Hall, 2024-06-10 This book offers guidance on capturing the creative forces of the faculty, staff, and students at universities. Given their unique and central role in America and the world, it examines how university research, learning, and service can be integrated to address the needs of society as it is both enabled and changed by technology. In turn, the book assesses the challenges and opportunities for universities to be more successful and impactful through innovation, viewing universities as integrated systems. It demonstrates how change can occur both within the knowledge economy and because of innovations within it. In doing so, the book provides insights into how universities can prosper and lead in a world that is constantly changed by the innovations that universities and industry jointly create. The book serves as a guide for higher education policymakers, funders, donors, board members, stakeholders, and leaders, chairs, deans, provosts, presidents, through its systematic vision for university innovation and service to society. It will also benefit researchers studying innovation in organizations, illustrating how systematic approaches arising from management science and operations research can be used toward positive change. Lastly, strategic partners in industry, government, and foundations seeking opportunities for partnerships and collaboration with universities will also find it useful.

Worlds Scott D. Carpenter, Helena Kaufman, Malene Torp, 2023-07-03 What if our students learn the most when they're far from campus? Integrating Worlds demonstrates how high quality off campus study epitomizes integrative learning both supporting and enhancing the entire undergraduate experience. While off campus study, both study abroad or study away, occupies a marginal position on most campuses, it has the almost unique capacity to bring together a high concentration of high impact educational practices. When we combine global learning with collaborative work, shared intellectual pursuits, learning communities, and more, these practices reinforce each other, exerting a multiplier effect that can potentially result in the most intense learning experience our students will have. It can energize and inspire them for the work they will continue to undertake on their home campus. It thus becomes crucial for us to identify or design high quality programs that will achieve these goals. Moreover, we need to reimagine off campus study as an integrated portion of the undergraduate arc, one that begins well before our students depart and continues long after they return. In this way, we help them understand the interconnectedness not only of the world but also of their own education. At the same time, the authors recognize material constraints and educational imperatives. Off campus study costs money; its complexity makes it difficult to assess; it overlaps increasingly with internships and civic engagement, and by its nature, it is more subject to external forces than the on campus experience. In careful, practical ways, Integrating Worlds advances suggestions for dealing with these issues. This book urges educators to go beyond the episodic ways we currently link on campus curricula to off campus experience. While of interest to specialists in international or intercultural education, it speaks most directly to faculty, deans, and provosts, many of whom may have little or dated experience of study abroad and who thus feel unprepared to address this issue of pressing importance. As our disciplines and institutions face the complexities of a rapidly changing world, this book seeks to fuel the necessary conversations.
