Investment In Startups And Small Business Financing Farhad Taghizadeh-hesary, Naoyuki Yoshino, Chul Ju Kim, Peter J Morgan, Daehee Yoon, 2021-08-03 Successful startups and small businesses can play a significant role in economic growth and job creation. They also contribute to economic dynamism by spurring innovation and injecting competition. Startups are known to introduce new products and services that can create new value in the economy. It is notable that most startups exit within their first ten years and most surviving young businesses do not grow but remain small. Startups and small businesses face several obstacles to their development. Accessing capital is a crucial constraint on their growth. Most startups and small businesses have difficulties getting the funds they need because of their lack of a performance track record and lack of collateral, making it difficult for lenders or investors to assess their risk. Besides, they are in the early stages of development and face a very high possibility of failure, which significantly raises financing and investment risk. Investment in Startups and Small Business Financing provides 12 thematic and case studies on new methods for bringing private investment loans or equity to startups and easing small businesses' access to finance, debt, and capital. The contributors are senior-level policy experts and researchers from governments, think tanks, academia, and international organizations. The chapters are authored in a policy-oriented way to be understandable for the readers with a different background. This book is a precious source for the governments for adopting the right policies to develop small businesses and startups and valuable for the researchers in economics, business, and finance.

Winning with Data Tomasz Tunguz, Frank Bien, 2016-05-26 Crest the data wave with a deep cultural shift. Winning with Data explores the cultural changes big data brings to business and shows you how to adapt your organization to leverage data to maximum effect. Authors Tomasz Tunguz and Frank Bien draw on extensive background in big data, business intelligence, and business strategy to provide a blueprint for companies looking to move head-on into the data wave. Instrumentation is discussed in detail, but the core of the change is in the culture. From decision making and strategy to shipping and sales, this book shows you how data makes better business. Big data has taken on buzzword status, but there is little real guidance for companies seeking everyday business data solutions. This book takes a deeper look at big data in business and shows you how to shift internal culture ahead of the curve. Understand the changes a data culture brings to companies. Instrument your company for maximum benefit. Utilize data to optimize every aspect of your business. Improve decision making and transform business strategy.
