Hawkins,1976-04 Water is basic to terrestrial life and its distribution has controlled the growth and spread of human civilization The importance of water to modern industrial processes urban planning and agricultural development is hard to overestimate With these compelling motivations it is natural that more technical and scientific study should have been devoted to this one substance than to any other Research on water and its solutions has exhibited a marked expansion during the last decade In significant degree this has resulted from the availability of new experimental tools and techniques and of dramatic advances in computing science This combination in skilled hands promises eventually to explain the unusual properties of water and aqueous solutions in unequivocal molecular terms like wise one now has reasonable hope that the active role that water plays in biochemical processes will be revealed and

explained quantitatively at the molecular level Owing to the widespread scholarly interest in aqueous science it is clear that guides to the overwhelming literature on the subject are valuable They serve ideally to indicate what is known and what is not which areas harbor controversies and what types of research attacks seem most fruitful in answering more questions than they raise Whatever time and resources need to be spent in preparing comprehensive bibliographies should be quickly offset in the total scientific community by the efficiencies generated Whitaker's Books in Print, 1998 **Canadiana**, 1975 **Government-wide Index to Federal Research & Development Reports**, 1967 *Current Index to Statistics, Applications, Methods and Theory*, 1994 The Current Index to Statistics CIS is a bibliographic index of publications in statistics probability and related fields **Library Journal** Melvil Dewey, Richard Rogers Bowker, Frederick Leyboldt, Charles Ammi Cutter, Bertine Emma Weston, Karl Brown, Helen Elizabeth Wessells, 1952 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Issued also separately
