*The Power of Identity and Ideology in Language Learning* Peter I. De Costa, 2016-05-09 This critical ethnographic school based case study offers insights on the interaction between ideology and the identity development of individual English language learners in Singapore Illustrated by case studies of the language learning experiences of five Asian immigrant students in an English medium school in Singapore the author examines how the immigrant students negotiated a standard English ideology and their discursive positioning over the course of the school year Specifically the study traces how the prevailing standard English ideology interacted in highly complex ways with their being positioned as high academic achievers to ultimately influence their learning of English This potent combination of language ideologies and circulating ideologies created a designer student immigration complex By framing this situation as a complex the study problematizes the power of ideologies in shaping the trajectories and identities of language learners      (Re)Constructing Memory:

Textbooks, Identity, Nation, and State James H. Williams, Wendy D. Bokhorst-Heng, 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation Authors voices come from a variety of contexts some historical some contemporary some providing analyses over time But they all consider the changing portrayal of diversity belonging and exclusion in multiethnic and diverse societies where silenced invisible marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative The authors discuss portrayals of past exclusions around religion ethnicity sexual orientation as they look at the shifting boundaries of insider and outsider This book is thus about who we are not only demographically but also in terms of the past especially how and whether we teach discredited pasts through textbooks The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive critical and positively bonding in increasingly larger and more inclusive contexts      The Colonial Past in

History Textbooks - Historical and Social Psychological Perspectives Karel Van Nieuwenhuysse, Joaquim Pires Valentim, 2018-05-21 This book analyzes how colonial history is depicted in post war textbooks worldwide from the mid 19th century to the 1960s 70s It uses an interdisciplinary approach to explore portrayals in former colonizer and colonized countries focusing on collective memory popular culture and academic knowledge      **Zimbabwe Books in Print**, 1998
