his professional journey travelling through an upcoming field of surgery with apparently unlimited possibilities Kees van Laarhoven witnessed major milestones and breakthroughs Already as a medical student he was amazed by surgical courage During residency he experienced hard work diligence and perseverance of surgical professionals Today as a surgeon with over 25 years of clinical experience he now looks at pieces of art in surgery with professionals compassionately bringing hope to patients But he also sees inconvenient truths in our healthcare system with patients evolving from one predictable and preventable disease to the next and with professionals following disease trends rather than applying their knowledge to redirect disease into health The modern disease oriented care system becomes undesirable and unsustainable And there are more inconvenient truths that have progressed rather than diminished in time Healthcare is not easily accessible to the major half of the global population and for those who have access with a growing global population healthcare may become unaffordable in the future Moreover from an environmental perspective both human and planetary health are compromised and ask for a One Health approach Being fascinated by the questions of

how and why did this all happen Kees van Laarhoven took up a scientific survey to comprehend and learn how things still can be changed He found that clear solutions are there Please join him on his journey

The Scientific Basis of Integrative Health Leonard Wisneski,2017-05-25 Since the first suffering supplicant offered a prayer to his god or the first mother cradled an ailing child in her caring arms we have witnessed how human health and healing go beyond any inventory of parts and infusion of chemicals We humans are a complex melding of thought emotion spirit and energy and each of those components is as critical to our well being as our physiological status Even if we are just beginning to quantify and document these seemingly intangible aspect to ignore them in the practice of medicine is neglect and an invitation to do harm The Scientific Basis of Integrative Health has been extensively updated and expanded to provide a comprehensive guide to integrative medicine Taking a balanced and objective approach this leading text bridges the gap between Western science and Eastern philosophy It provides doctors and other health practitioners with information on complementary and alternative approaches to health that is authoritative evidence based and epidemiologically substantiated Written for doctors and healthcare professionals by pioneering practitioners and updated with the newest research across and increasing range of possibilities this third edition includes nine new chapters covering topics such as Electrophotonic imaging Neuroacupuncture Naturopathic medicine Integrative nutrition
