Advanced Gut Health Foods 2025 For Students:

Harnessing the Potential of Functional Foods Containing Bioactive Compounds: Implications for Health and Sustainability Ali Rashidinejad, Muhammad Ijaz Ahmad, 2026-03-10 Functional foods containing bioactive compounds have emerged as a subject of immense interest due to their potential in promoting health and mitigating chronic diseases. However, despite the growing popularity, there exists a critical need to comprehensively understand their mechanisms of action, assess their impact on human health across various demographics, and optimize their production and consumption within sustainable food systems. This Research Topic seeks to bridge these knowledge gaps and provide a holistic perspective on the role of functional foods in enhancing human health and sustainability. Functional foods containing bioactive compounds have garnered significant attention due to their potential to promote health and prevent chronic diseases. This Research Topic will provide a platform for researchers to discuss recent advancements, challenges, and opportunities in the field. Topics of interest may include, but are not limited to: Identification and characterization of bioactive compounds in food sources; Sustainable production and processing of functional foods; Mechanisms of action underlying the health benefits of functional foods containing bioactive compounds; Effects of functional foods and bioactive compounds on metabolic health, immune function, and gut microbiota; Role of functional foods in the prevention and management of specific chronic diseases such as cardiovascular diseases, diabetes, and obesity; Consumer acceptance, behavior, and preferences regarding functional foods; Policy and regulatory aspects related to functional foods and bioactive compounds.

Biopolymers Musarrat Husain Warsi, Rishabha Malviya, 2026-01-01 This book presents an in-depth exploration of biopolymers in biomedical engineering, spanning 15 chapters. Each chapter delves into different aspects of biopolymers, including their origins, development, potential, and sustainable sources, as well as advanced eco-friendly production methods. The text covers a wide range of applications, from advanced drug delivery systems and gene therapy to tissue engineering. Additionally, it addresses the use of biopolymers in the food industry and their role in packaging. The book also highlights the impact of artificial intelligence on creating sustainable biopolymers and advancing drug delivery technologies, including 3D and 4D methods for personalized treatments. It offers a thorough review of biopolymer-assisted drug delivery, implantable devices, and diagnostic applications. Furthermore, it discusses important patents, toxicity concerns, regulatory issues, and future prospects in the field. This comprehensive resource is invaluable for researchers, Ph.D. students, pharmaceutical, and food industries working in the dynamic area of sustainable biomedical engineering.

Emotional Labour in the Nursing Care of Children, Young People and their Families Mandy Brimble, 2026-03-17 This practical textbook uses case studies to highlight how emotional labour can arise and be managed in a range of settings where children's nurses work. The book begins with an introduction to ideas about emotional labour and discusses their relevance to children's nursing, emphasising that children's nurses not only deal with the emotional needs of children and themselves but also those of parents and carers. The book then takes a case study approach

presenting a wide range of chapters each focusing on a different area of practice across acute care and long term care Each chapter explores the relevance of emotional labour to the topic in question presenting a case study discussing the issues raised by the case study in the context of the wider literature and considering how potential challenges could be managed The second thematic part of the book builds on the case study chapters to discuss challenges and strategies for managing emotional labour disenfranchised grief and professional boundaries in children s nursing Chapters include Time out Reflection and Key Points sections to encourage the transfer of learning to practice This is the first book devoted to emotional labour in nursing care of children young people and their families It is an essential text for child nursing field students and a useful evidence based reference for practitioners and scholars with an interest in emotional labour
