Children's Rights and Criminal Justice in the Digital Age Wendy O'Brien, 2024-11-25 In the data economy childhood is a lucrative commodity The digital technologies that offer incredible possibilities for children s enrichment and empowerment also open avenues for their exploitation denigration criminalisation and control Coming to grips with this paradigm of technological benefits and harms requires a deepened understanding about how children s rights are engaged within a technocratic system that distributes costs and benefits unequally In the context of the altered flows of data and power in the digital age Wendy O'Brien argues for a resurgence in the commitment to equal human dignity Challenging narrow conceptualisations of online risks to children the book identifies the need to confront the techno social status quo that accepts harms against children as inevitable This book will be of interest to legal scholars criminologists policy makers and technologists with an interest in upholding children s rights in the age of AI

Everything is Design: The Hidden Ethics of Our Objects and Public Spaces Alan J. Reid, 2025-05-06 Ethics to put it concisely is mindful well being It is a set of standards that guides how we treat ourselves one another and the environment When we design things for public use we also communicate an ethical perspective When we use things designed for us we adopt their ethics This book synthesizes several different disciplines as they relate to design ethics and the built environment Our objects according to philosophers like Ihde Verbeek and Latour mediate our experiences with the world around us Through their designs and by extension our perceived affordances we largely comply with what our objects and spaces want us to do At the micro level the phones in our pockets command our attentive processes in order to feed an attention economy At the macro level urban planning and infrastructure can both promote inclusivity and foment violence We are deeply intertwined with the objects and spaces that have been designed for us Baked into every object process system and

environment are the remnants of the designer's morals, ethics, values, and biases. Importantly, this book seeks to cultivate mindfulness of the reader's interactions with their surrounding world, providing them with a line of inquiry that questions areas of unethical design in their built environment and offers useful critiques and new solutions to these ethical dilemmas. We often have the power to reject those things that are irresponsibly designed and unethical in nature, and it is through this agency as users that we can demand better from designers, developers, and companies. It is imperative to understand our mediated relationships with the built environment that surrounds us and the objects within it; this can help explain our behaviors and empower us to make ethical decisions that serve future generations. **After Montaigne** Michel

Montaigne, 2015-09-15. Writers of the modern essay can trace their chosen genre all the way back to Michel de Montaigne (1533-92). But save for the recent notable best-seller *How to Live: A Life of Montaigne* by Sarah Bakewell, Montaigne is largely ignored. *After Montaigne*, a collection of twenty-four new personal essays intended as tribute, aims to correct this collective lapse of memory and introduce modern readers and writers to their stylistic forebear. Though it's been over four hundred years since he began writing his essays, Montaigne's writing is still fresh, and his use of the form as a means of self-exploration in the world around him reads as innovative even by modern standards. He simply put the writer to whom all essayists are indebted. Each contributor has chosen one of Montaigne's 107 essays and has written his/her own essay of the same title and on the same theme, using a quote from Montaigne's essay as an epigraph. The overall effect is akin to a covers album, with each writer offering his or her own interpretation and stylistic verve to Montaigne's themes in ways that both reinforce and challenge the French writer's prose ideas and forms. Featuring a who's who of contemporary essayists, *After Montaigne* offers a startling engagement with Montaigne and the essay form while also pointing the way to the genre's potential new directions. Contributors: Marcia Aldrich, Chris Arthur, Robert Atwan, Barrie Jean Borich, Mary Cappello, Steven Church, Judith Ortiz Cofer, Danielle Cadena Deulen, Brian Doyle, Lina M. Ferreira, C. V. Frontiers, Neil McLennan, 2013-04-11. Never did anyone think that the project aimed at giving people a voice and stimulating people's interest in making positive changes in our world would go international. Two years after the original idea, here is the international. As the title says, this truly is *Ideas Without Frontiers*. [Arizona Journal of International and Comparative Law](#)
