Sustainable Development Goals and Institutions of Higher Education Godwell Nhamo, Vuyo Mjimba, 2019-09-14

This volume brings together both theoretical and case study based contributions to the implementation of the Sustainable Development Goals (SDGs) in Institutions of Higher Education (IHE) presenting an impactful combination of authors from both developing and developed countries. While most current publications addressing the SDGs and education focus on sustainable development in general and specific topics such as climate change or energy, this book attempts to accelerate the localisation of the SDGs by presenting opportunities and innovations offered in various universities and campuses regarding SDGs localisation. The book seeks to provide an important contribution to the global dialogue on IHE and the SDGs and will be of interest to academics and researchers engaged in the SDGs and education as well as government agencies and other interested stakeholders. The book focuses on curriculum and learning matters, research and development as well as community engagement. Case studies detail the integration of SDGs in academic and professional development, new approaches to implementing sustainability science instruction, improvements in teaching practices to enhance teacher competence and responsible management education. Additional focus is placed on the alignment of the SDGs in higher education with the other goals, emphasizing technological innovation for improved human health and environmental management and climate change policies and action plans. Interdisciplinary solutions for pressing environmental problems are also provided, making sure that no one is left behind in realising these global development goals.

University and Academics' Societal Engagement in Sub-Saharan Africa Nelson Casimiro Zavale, Christian Schneiderberg, 2024-07-18

This book provides a comprehensive account of the patterns of university and academics societal engagement in Sub-Saharan Africa (SSA), considering knowledge production and the resulting outputs, outcomes, and benefits that are yielded from such engagement for society. Responding to the call for increased visibility of otherwise marginalised voices in SSA's extant global literature on knowledge production, chapters in the book explore questions around knowledge-based economies and forms of knowledge and suggest an alternative framework to overcome conventional bias and limits present in prominent concepts such as National Systems of Innovation, Triple Helix, and Mode 2. Further, the authors examine the main drivers, constraints, and barriers to this engagement and the typology of those with a vested interest in its development. Ultimately, exploring how higher education institutions in SSA engage with and transfer knowledge to different external stakeholders, this book will be of value to academics involved with the study of higher education and science innovation, studies in the sociology of education, and education and development more broadly. In addition, politicians, administrators, and practitioners related to higher education, science, and innovation will also find the book of use.
