Figure 6.1 The cell is an organism's basic unit of structure and function. Many forms of life exist as single-celled organisms, such as the *Paramecium* shown here. Larger, more complex organisms, including plants and animals, are multicellular. In this chapter, we focus mainly on eukaryotic cells—cells with a nucleus.

How does the internal organization of eukaryotic cells allow them to perform the functions of life?

Internal membranes divide a cell, such as this plant cell, into compartments where specific chemical reactions occur.

Energy and matter transformations

A system of internal membranes synthesizes and modifies proteins, lipids, and carbohydrates.

Chloroplasts convert light energy to chemical energy.

Mitochondria break down molecules, generating ATP.

Interactions with the environment

The plasma membrane controls what goes into and out of the cell.

Plant cells have a protective cell wall.

Genetic information storage and transmission

DNA in the nucleus contains instructions for making proteins.

Ribosomes are the sites of protein synthesis.

Dynamic Structure of Reality Nelson R. Orringer,2010-10-01 Dynamic Structure of Reality makes available in English some of the most mature thought of the modern Spanish philosopher Xavier Zubiri He first presented this material as a set of 1968 public lectures in Madrid They were collected edited and published in 1989 as Estructura din mica de la realidad In 1962 Zubiri had published Sobre la esencia On essence a work of metaphysics that was praised by critics with one qualification its treatment of reality was too static The 1968 course was devised as a response to those critics Dynamic Structure of Reality retraces the road Hegel traveled concerning the creation of a self and how that self is realized by an interplay between spirit and nature Like his great predecessor Jos Ortega y Gasset and like his great Jewish contemporary Emmanuel Levinas Zubiri takes religion in all seriousness and locates its questions within the questions of modern philosophy In harmony with science he advances a new idea of becoming Reality not being becomes As reality s traits are revealed in different degrees reality resembles God the universal self giver Zubiri systematically touches on many disciplines to show the varieties of self giving throughout the universe of structural dynamism
