Manufacturing a product is not difficult the difficulty consists in manufacturing a product of high quality at a low cost and rapidly Drastic technological advances are changing global markets very rapidly In such conditions the ability to compete successfully must be based on innovative ideas and new products which has to be of high quality yet low in price One way to achieve these objectives would be through massive investments in research of computer based technology and by applying the approaches presented in this book The First International Conference on Advanced Manufacturing Systems and Technology AMST87 was held in Opatija Croatia in October 1987 The Second International Conference on Advanced Manufacturing Systems and Technology AMSV90 was held in Trento Italy in June 1990 The Third Fourth Fifth and Sixth Conferences on Advanced Manufacturing Systems and Technology were all held in Udine Italy as follows AMST93 in April 1993 AMST96 in September 1996 AMST99 in June 1999 and AMST02 in June 2002 Integrated Product, Process and Enterprise Design Ben Wang,1997-08-31 The need exists in the private sector and government manufacturing sites to reduce product development time production lead times inventory and non value added activities At the same time there is increased pressure to improve manufacturing process yields production efficiency and resource utilization Much of the technology required to meet these needs already exists but an integrated structure that can demonstrate the potential for the technology in a concurrent engineering context does not This book provides a road map for building the integrated technology environment to evaluate existing products manufacturing processes and system design tools This book details innovative approaches that will significantly improve design manufacturing technology development and deployment capabilities for civilian and defense applications These approaches are integrated product process and system design IPPSD initiatives which will greatly enhance the manufacturing competitiveness of the economy These approaches involve the use of simulation modeling tools and computerized virtual workstations in conjunction with a design environment which allows a diverse group of researchers manufacturers and suppliers to work within a comprehensive network of shared knowledge The IPPSD infrastructure consists of virtual workstations servers and a suite of simulation quantitative computational analytical experimental and qualitative tools Such an IPPSD infrastructure will permit effective and efficient predictions of complete product design manufacturing process design and customer satisfaction **Concurrent Design of Products, Manufacturing Processes and Systems** Ben Wang,1999-01-27 Methods presented involve the use of simulation and modeling tools and virtual workstations in conjunction with a design environment This allows a diverse group of researchers manufacturers and suppliers to work within a comprehensive network of shared knowledge The design environment consists of engineering workstations and servers and a suite of simulation quantitative computational analytical qualitative and

experimental tools Such a design environment will allow the effective and efficient integration of complete product design manufacturing process design and customer satisfaction predictions This volume enables the reader to create an integrated concurrent engineering design and analysis infrastructure through the use of virtual workstations and servers provide remote instant sharing of engineering data and resources for the development of a product system mechanism part business and or process and develop applications fully compatible with international CAD CAM CAE standards for product representation and modeling *Manufacturing Processes for Engineering Materials* Serope Kalpakjian,1997-01-01
