**Abstract:** Little research has examined the relationship between academic content coverage in kindergarten and student achievement. Using nationally representative data, we examine the association between reading and mathematics content coverage in kindergarten and student learning, both overall and for students who attended preschool, Head Start, or participated in other care prior to kindergarten entry. We find that all children benefit from exposure to advanced content in reading and mathematics and that students do not benefit from basic content coverage. Interestingly, this is true for all children, regardless of whether they attended preschool, began kindergarten with more advanced skills, or are from families with low income. Policy implications are discussed.

**Acknowledgements:** Thanks to Emily Bigelow and Maïda Finch for their input on coding teacher survey items on content coverage. We appreciate helpful comments and feedback on earlier versions of this paper from Dale Ballou, Daphna Bassok, Rob Crosnoe, Pamela Davis-Kean, Greg Duncan, Chloe Hutchinson Gibbs, Jens Ludwig, participants at the Chapin Hall Research Seminar, and at the AERA 2012 Annual Meeting. *Opportunity to Learn, Curriculum Alignment and Test Preparation* Jaap Scheerens, 2016-08-30 This book provides a review of the effectiveness of Opportunity to Learn OTL operationalized as the association between OTL and student achievement In addition it presents an elaborate conceptual map in which OTL is regarded as part of a larger concept of curriculum alignment Major components of this framework are national goals and standards school curricula formative tests textbooks actual delivery of content as part of teaching and summative tests and examinations Alignment between educational goals intended and implemented curricula and educational outcomes is considered an important prerequisite for effective education The expectation is that better alignment leads to better student performance The concept of OTL is commonly used to compare content covered as part of the implemented curriculum with student achievement As such it is to be seen as a facet of the broader concept of alignment As it comes to enhancing OTL in educational policy and practice proactive curriculum development is compared to a more retroactive orientation Legitimate forms of test and examination preparation belong to this retroactive orientation and are seen as favorable conditions for optimizing OTL This book reviews the research evidence on the effects of OTL on student achievement by means of detailed descriptions of key empirical studies a review of meta analyses a vote count syntheses of 51 empirical studies conducted between 1995 and 2015 and a secondary analysis based on TIMSS 2011 and PISA 2012 data It concludes that the effect size of OTL at about 30 is modest but comparable in size to other effectiveness enhancing conditions in schooling The final chapter of the book provides suggestions for educational policy and practice to further optimize OTL
