**Making Thinking Visible** Ron Ritchhart, Mark Church, Karin Morrison, 2011-03-25 A proven program for enhancing students thinking and comprehension abilities

Visible Thinking is a research based approach to teaching thinking begun at Harvard's Project Zero that develops students thinking dispositions while at the same time deepening their understanding of the topics they study

Rather than a set of fixed lessons Visible Thinking is a varied collection of practices including thinking routines small sets of questions or a short sequence of steps as well as the documentation of student thinking

Using this process thinking becomes visible as the students different viewpoints are expressed documented discussed and reflected upon

Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy to implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms

investment in physical infrastructure and is more typical of on premises environments The shift to OpEx allows for greater flexibility and scalability as costs are based on actual usage rather than upfront investments Public cloud is a deployment model not an expenditure model Azure Reservations can provide cost savings in Azure but they are a method of payment within the OpEx model rather than a separate expenditure model Capital Expenditures or CapEx is defined as funds used allocated by organizations to obtain upgrade and maintain physical assets that are paid upfront such as data centers These expenditures are generally nonrecurring and result in the acquisition of permanent assets The Azure Reservations service is an example of a CapEx model Operating Expenditures or OpEx is defined as funds that are used by organizations for their day to day operations Think of OpEx as your electricity and water bill The more you use the higher the charges Azure on demand or pay as you go pricing is an example of an OpEx model Hence this correct answer is Operating expenditure
