Canada, the International Financial Institutions and the Debt Problem of Developing Countries Canada. Parliament. Senate. Standing Committee on Foreign Affairs, George C. Van Roggen, 1987 **Inequality in Latin America** David M. De Ferranti, 2004-01-01 Latin America and the Caribbean has been one of the regions of the world with the greatest inequality. This book explores why the region suffers from such persistent inequality, identifies how it hampers development, and suggests ways to achieve greater equity in the distribution of wealth, incomes, and opportunities. The study draws on data from 20 countries based on household surveys covering 36 million people and reviews extensive economic, sociological, and political science studies on inequality in Latin America. Four broad areas for action by governments and civil society groups to break the destructive pattern are outlined: 1. build more open political and social institutions that allow the poor and historically subordinate groups to gain a greater share of agency voice and power in society; 2. ensure that economic institutions and policies seek greater equity through sound macroeconomic management and equitable, efficient crisis resolution institutions that avoid the large regressive redistributions that occur during crises and that allow for saving in good times to enhance access by the poor to social safety nets in bad times; 3. increase access by the poor to high quality

public services especially education health water and electricity as well as access to farmland and the rural services and protect and enforce the property rights of the urban poor 4 reform income transfer programmes so that they reach the poorest families
