Gajdzik, Magdalena Jaciow, Radoslaw Wolniak, Robert Wolny, 2025-02-28 The book primarily focuses on the process of industrial transformation in the era of digitalization. It meticulously discusses the processes, technologies, and business models that delineate modern industrial landscapes. A business maturity model is a tool used in organizations to assess how advanced their processes, systems, and procedures are. This model is utilized to identify areas that might require improvements and then to measure progress in these improvements. The goal is to achieve maturity, meaning the organization has well-defined, measurable, and repeatable processes. The first chapter traces the evolution of the manufacturing sector, emphasizing the shift toward digitalization and automation while considering historical context and future trends. The second chapter examines business maturity models, reviewing current approaches and arguing for a broader perspective that includes environmental and social considerations. Chapter three introduces a research model for assessing the maturity of Polish manufacturing companies, detailing the methodology and research instruments used. The fourth chapter presents case studies from Polish industries: automotive, steel, and food, providing practical insights into the application of maturity models in real-world scenarios.

Introduction to Manufacturing Processes Mikell P. Groover, 2012-04-13 Mikell Groover, author of the leading text in manufacturing processes, has developed *Introduction to Manufacturing Processes* as a more navigable and student-friendly text, paired with a strong suite of additional tools and resources online to help instructors drive positive student outcomes. Focusing mainly on processes, tailoring down the typical coverage of both materials and systems, the emphasis on manufacturing science and mathematical modeling of processes is an important attribute of the new book. Real-world design case studies are also integrated with fundamentals. Process videos provide students with a chance to experience being on the floor in a manufacturing facility, followed by case studies that provide individual students or groups of students to dig into larger, more design-oriented problems. *Proceedings Of 17th All India Manufacturing Technology*,
